SAFETY

WARNING! Before carrying out any operations with the unit, carefully read this instruction manual and keep it with care for future reference, it contains important information about the installation, user and maintenance of the unit.

General instructions

- The products referred to in this manual conform to the European Community Directives and are therefore marked with CE.
- The unit is supplied with hazardous network voltage (230V~). Leave servicing to skilled personnel only. Never make any modifications on the unit not described in this instruction manual, otherwise you risk an electric shock.
- Connection must be made to a power supply system fitted with efficient earthing (Class I appliance according to standard EN60598-1). It is recommended to protect the supply lines of the units from indirect contact and/or shorting by using appropriately sized residual current devices.
- The connection to the main network of electric distribution must be carried out by a qualified electrical installer. Check that the mains frequency and voltage correspond to those for which the unit is designed as given on the electrical data label.
- This unit is not for home use, only use for professional applications.
- Never use the fixture under the following conditions:
 - in places subject to vibrations or bumps;
 - in places with a temperature of over 40 °C.
- Make certain that no flammable liquids, water or metal objects enter the fixture.
- Do not dismantle or modify the fixture.
- All work must always be carried out by qualified technical personnel. Contact the nearest sales point for an inspection or contact the manufacturer directly.
- If the unit is to be put out of operation definitively, take it to a local recycling plant for a disposal which is not harmful to the environment.

Warnings and installation precautions

- If this device is operated in any way different to the way described in this manual, it may suffer damage and the warranty becomes void. Any unauthorized operation may lead to dangers like short circuit, burns, electric shock, etc.
- Before starting any maintenance work or cleaning the fixture, cut off power from the main supply.
- Always additionally secure the fixture with a safety chain. When carrying out any work, always comply scrupulously with all the regulations (particularly regarding safety) currently in force in the country in which the fixture is being used.
- Install the fixture in a well-ventilated place.
- Keep any flammable materials at a safe distance from the fixture.
- Shields, lenses or ultraviolet screens shall be changed if they have become damaged to such an extent that their effectiveness is impaired.
- The lamp (LED) shall be changed if it has become damaged or thermally deformed.
- Never look directly at the light beam. Note that fast changes in lighting, e.g. flashing lights, may trigger epileptic seizures in photosensitive persons or persons with epilepsy.
- Do not touch the product's housing when operating because it may be very hot.

INTRODUCTION

Features

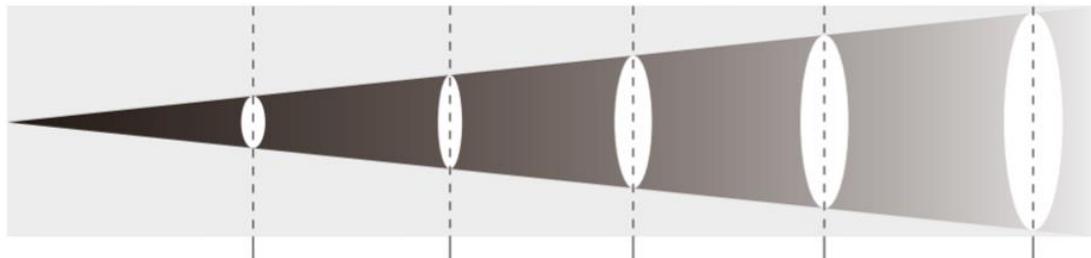

- Creative double-sided design provides flexible solutions for different applications
- Up to 9600lm (front beam/wash panel), up to 18000lm (back strobe panel)
- Speedy infinite pan/tilt movement
- Motorized wide-ranging zoom of 3~37°
- 4 dimming curves with 16-bit high resolution control
- Selectable PWM frequency for flicker-free video
- DMX, RDM and Art-Net control

SPECIFICATIONS

Light Source:	Front panel: 7 x 60W RGBW 4-in-1 + 280W WW&CW Back panel: 700W RGBW
Lumen Output:	Front panel: up to 9600lm Back panel: 18000lm
Lux Output:	Front panel: 52000lux @ 3M Back panel: 800lux @ 3M
Color Temperature:	2800~8000K
CRI:	Ra ≥ 68
DUV:	0.0001 - 0.009
Wavelength:	Front panel: R: 620nm G: 526nm B: 453nm Back panel: R: 623nm G: 526nm B: 457nm
TM-30-15rg/rf:	98/83 TLCI: 70
LED Life:	20000 hrs
Beam Angle:	Front panel: 3~37° Back panel: 70°
Field Angle:	Front panel: 4~51° Back panel: 124°
Pan Movement:	Infinite movement
Tilt Movement:	Infinite movement
Color Mixing:	Front panel: RGBW+WW+CW Back panel: RGBW
Zoom:	3~37° motorized
Strobe:	0~30Hz
LED Refresh Rate:	600Hz/1200Hz/2000Hz/4000Hz/6000Hz/25kHz
Dimmer:	4 dimming curves, 0~100% adjustable
Mains:	100~240VAC, 50-60Hz
Consumption:	920W @ 230V (strobe: 1500W @ 230V)
Fuse:	T15A
Power Connections:	PowerCon In
Power Factor:	0.96 @ 230V
Protocol:	DMX512/RDM/ArtNet
Data Connections:	3 or 5 pin XLR In/Out for DMX RJ45 In/Out for ArtNet
DMX Channels:	26CH/50CH/84CH/98CH
Display:	2.83-inch TFT display
Housing:	Flame-retardant nylon with black finish
Operating Temp.:	0~45°
Cooling:	Low noise fan for forced-air
IP Rate:	IP20
Dimension:	713*244*451mm
Weight:	27kg

DIMENSIONS

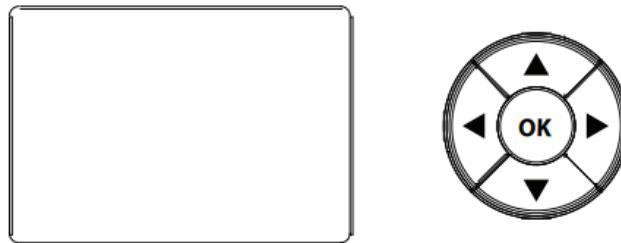

OVERVIEW

Fixture Illustration

- 1. Control Panel
- 2/3. RJ45 for Art-Net
- 4. 3 or 5 Pin XLR Input for DMX
- 5. 3 or 5 Pin XLR Output for DMX
- 6. Fuse
- 7. PowerCon Input
- 8. Clamp

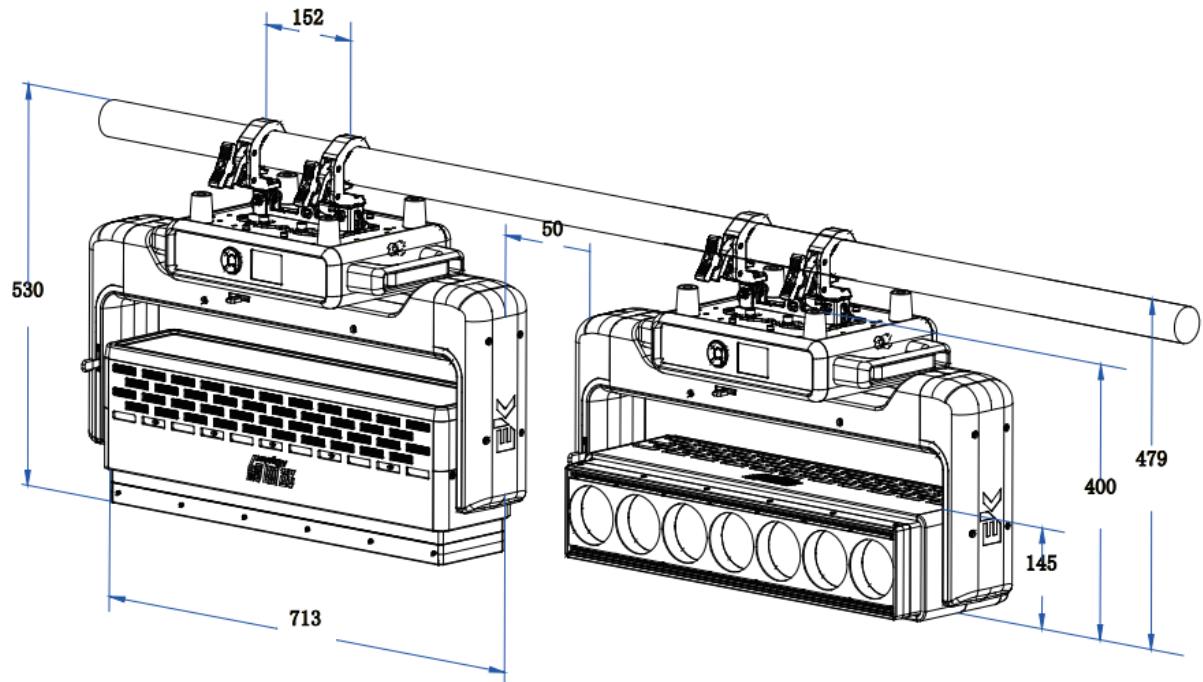

Control Panel

If the panel is password-protected, go to the Advanced menu, in the Menu locking submenu, and enter the unlock code using the navigation buttons: **1234**

If you want to flip the display, hold UP + DOWN buttons for 3seconds to set display orientation.

INSTALLATION

We recommend the following general guidelines below:

1. Always mount this product in a safe position and make sure there is adequate room for ventilation, configuration and maintenance.
2. Keep any flammable materials a safe distance from the fixture, as indicated in the safety notes.
3. Make sure that the device is not exposed to extreme heat, moisture or dust.
4. Make sure that the structure to which you are hanging the fixture can support the weight.

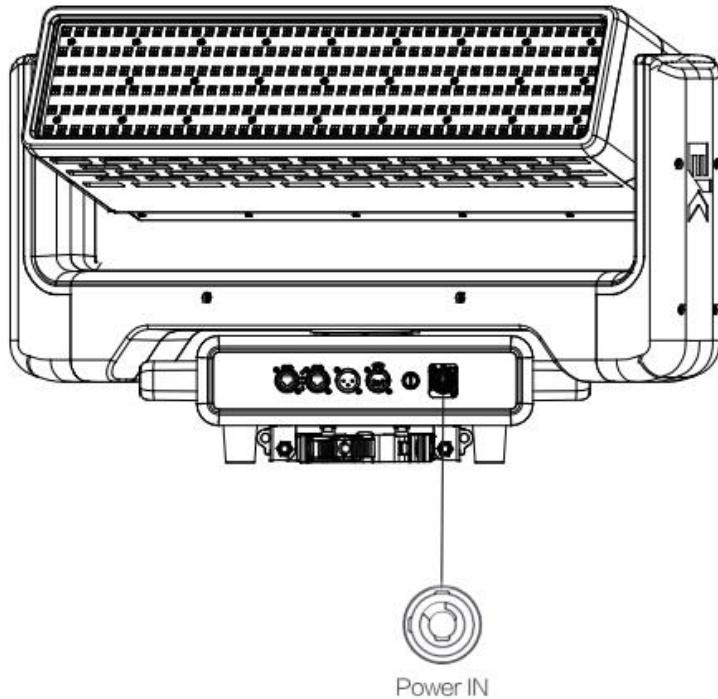

Alligator may be set up on a solid and even surface. The unit can also be mounted upside down to a cross arm. For mounting, stable mounting clamps are required. The mounting place must be of sufficient stability and be able to support a weight of 10 times the unit's weight.

When carrying out any installation, always comply with all regulations (particularly regarding safety) currently in force in the country in which the fixture is being used.

- Install the fixture at a suitable location by means of the mounting bracket.
- Always secure the fixture with safety chain to keep the fixture from falling. For this purpose, fasten the safety chain in a suitable position so that the maximum fall of the fixture will be 20 cm.
- Adjust the fixture and use the knob to slightly release or tighten the locking mechanism of the bracket if necessary.

CONNECTION

Power Connection

Using Power Con In power cable

Attention: due to power rating, one power cable can connect 1 unit maximum

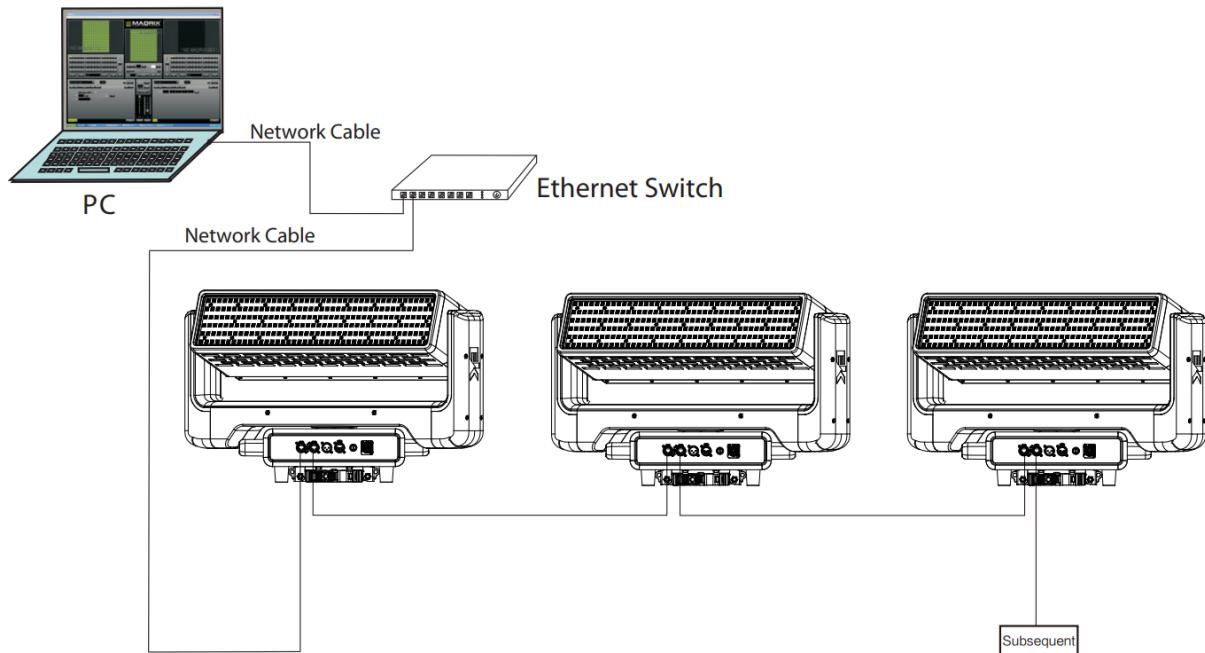

WARNING

Do not connect more than 1 unit in series with one power cable.

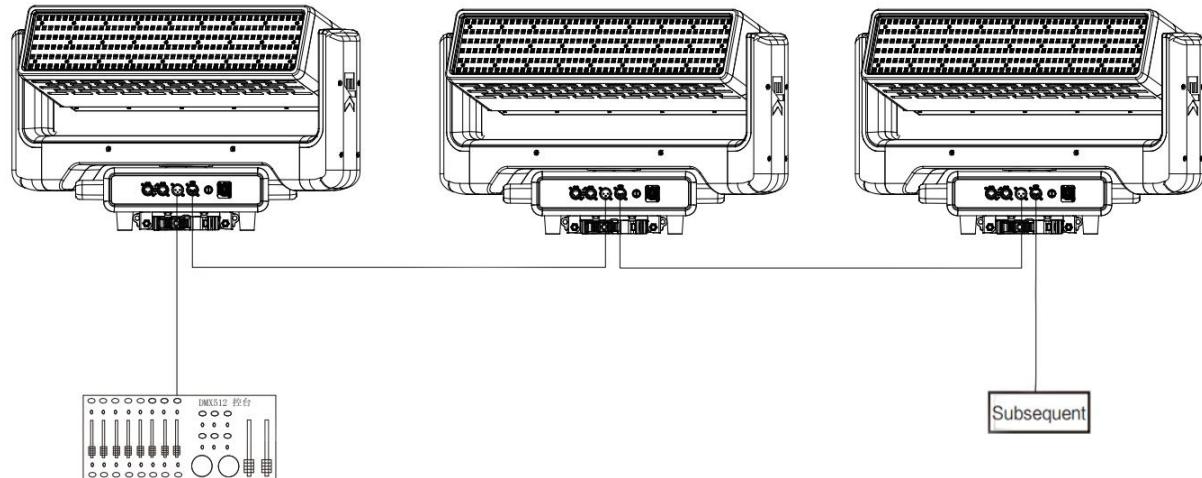

Do not use with damaged power cable.

Power off the fixture when not in use.

Ethernet Connection

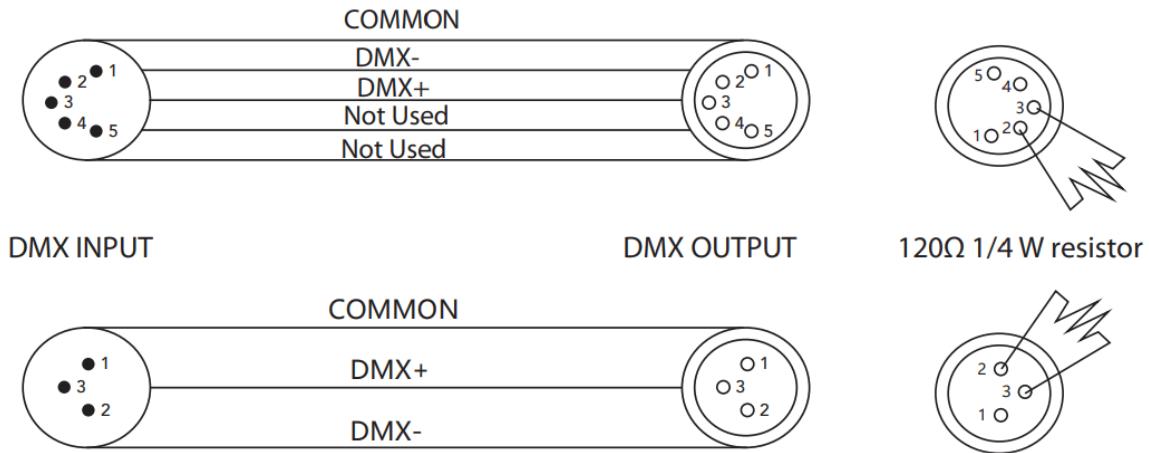

DMX Connection

DMX Connection

- Depending on the length of the DMX cable run, or other factors, it may be advisable to install a terminator at the last fixture in the run.
- The illustration below shows the correct placement of a 120Ω 0.25W resistor in a terminator, as well as the standard DMX signal pin connections

Example of DMX Addressing

The below table shows an example of starting addresses for four fixtures assuming a first fixture with starting address of 001.

The actual starting addresses will be determined by the operator as needed to match external controller settings.

MODE	ALLOCATION	ADDRESS 1 st Fixture	ADDRESS 2 nd Fixture	ADDRESS 3 rd Fixture	ADDRESS 4 th Fixture
26CH	001 – 026	001	027	053	079

Follow above method for subsequent fixtures, calculating addresses as indicated.

MAINTENANCE

Maintenance and Cleaning the Unit

- Make sure there are no persons standing below the unit when taking down/setting up.
- Switch off the unit, unplug the main cable and wait till the unit has cooled down.
- All screws used for installing the device and any of its parts should be tightly fastened and should not be corroded.
- Housings, fixings and installation spots (ceiling, trusses, suspensions) should be totally free from any deformation.
- The main cables must be in impeccable condition and should be replaced immediately when even a small problem is detected.
- It is recommended to clean the front at regular intervals, from impurities caused by dust, smoke, or other particles to ensure that the light operates at maximum brightness. For cleaning, disconnect the main plug from the socket. Use a soft, clean cloth moistened with a mild detergent. Then carefully wipe the parts dry. For cleaning other housing parts use only a soft, clean cloth. Never use a liquid, it might penetrate the unit and cause damage to it.

Fuse Replacement

1. Disconnect this product from the power outlet.
2. Using a screwdriver, unscrew the fuse holder cap from the housing.
3. Remove the blown fuse and replace with a good fuse of the same type and rating.
4. Screw the fuse holder cap back in place and reconnect power.

TROUBLESHOOTING

Problem	Possible Causes	Checks and Remedies
Fixture does not light up	<ul style="list-style-type: none">- No mains supply- Dimmer fader set to 0- Faulty LED- Faulty LED board	<ul style="list-style-type: none">- Check the power supply voltage- Increase value of the dimmer channels- Replace the LED board
General low light intensity	<ul style="list-style-type: none">- Dirty lens assembly- Misaligned LED assembly	<ul style="list-style-type: none">- Clean the fixture regularly- Install lens assemble properly
Fixture does not power up	<ul style="list-style-type: none">- No power- Loose or damaged power cord- Faulty internal power supply	<ul style="list-style-type: none">- Check for power on power outlet- Check power cord- Replace internal power supply

Contact an authorized service centre in case of technical problems, issues not reported in the above table, or problems that cannot be resolved by the procedure given in the table.
