# LED CYCLORAMA RGBWA

LEDCYC100

At last, a real LED alternative for Cyclorama lighting. Using RGBWA LED chips complete with amber depth control means that this unit is suitable for real world use. Theatres, production houses and venues will all love the small size, low power consumption and punchy output from this LED fixture.

With two adjustable 'heads' in each fixture, coverage of the wash is considerable.

Complete with individual LED electronic dimming, stand alone or in built programs as well as being DMX controllable means this unit is suitable for every level of the pro-lighting industry. Can be ground stacked (row) or mounted from a fly bar.

## Specifications
