LED LITEPAR PRO QUAD-7

7 X QUAD COLOURED LEDS IN A NEW PAR

Consisting of 7 QUAD-COLOUR RGBW- 8Watt LEDs this fixture can cover a large range of the colour spectrum including quality pastels, whites warm and cool. With a total 56Watts of LED power this compact unit has more than enough output to suit even the most fussy of production managers. Beam width is ideal, at 25degree, with control available via DMX, Static colour or Auto modes. Versatility and flexibility of use with this unit is assured.

Made of robust moulded aluminium, these new 'PARS' are stronger and longer lasting than the previous PAR64 / 56 type variants. This means they'll last longer in your installation or production department before requiring replacement. Therefore you will save money on buying replacements.
