HERCULES UPLIGHT SET OF 6 IN CASE

LEDSET005

The HERCULES is our premium battery operated LED Uplighters. Imagine, no more cables whether it be either power or data.

An attractive design coupled with massive output from the 4 x 10watt CREE RGBW LED chips makes this a sure fire winner for AV companies, Production houses and Venues who require a simple, fast and easy set up.

With on board genuine W-DMX receivers these can be controlled wirelessly, via DMX directly or stand alone, expect 9hours of battery life from the lithium powerpacks and yet they will only take 6hours to charge. A zoom range of 15 – 30degree, weight is 5.5kg per fixture and with an IP rating of IP54, means they are suitable for most applications.

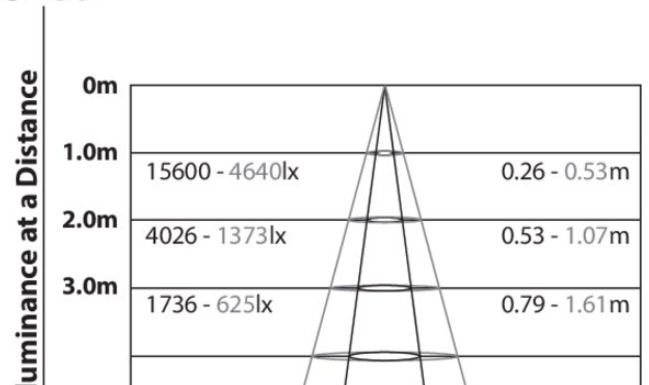

Hercules comes in a 'charge-in-roadcase' of 6 units ready for work. Single units are also available for purchase.

Specifications

Product	Hercules Uplight set of 6 in case
Code	LEDSET005
LED Quantity	4 x 10W
Power Supply	110-240V AC, 50/60Hz
