

# THRILL Compact PAR 64 LED

*Sit-flat wash light*

## Wash light to take your event from great to brilliant

The THRILL Compact PAR 64 LED features 36 pre-programmed colors along with full RGBWA + UV color mixing so any color in the spectrum can be created. THRILL Compact PAR 64 LED also features electronic strobe and dimming.

## Easy plug-and-play control

An included wireless remote control makes programming a breeze, simply point and click to get the color you want, or run the pre-programmed settings.

## Let the music do the talking

THRILL Compact PAR 64 LED features a built-in microphone—simply turn on the sound trigger and let the beat of your music THRILL your audience. In addition, the fixture has four professionally programmed preset shows that can be run with no lighting experience required.

THRILL Compact PAR 64 LED is a bright and powerful LED PAR can that washes your party or event with full, intense and saturated colors. Five 12-watt bright RGB, White, Amber and UV LEDs give a uniform field of light that is perfect for warm wall washes, truss toning and front or back lighting. The sit-flat design makes the light easy to slide under tables, tuck inside a truss or into any tight spot.

## KEY MESSAGES

### MARTIN HERITAGE

For 30 years, the Martin brand has been the leading choice of professional lighting designers, rental and production houses, and installers across the global architectural, commercial, and entertainment lighting markets. With the THRILL series, Martin is bringing its industry-leading excellence in dynamic light and visual effects to new audiences by providing more affordable and easier-to-use models, while still retaining a die-hard dedication to quality and our customers.

### PORTABLE AND LIGHTWEIGHT

Its portable and lightweight design and included remote makes the THRILL Compact PAR 64 LED ideal for on-the-go entertainers and small venues working with limited stage footprints. It's also perfect for rental companies who want to supply lighting solutions for smaller setups that do not have the budget for professional lighting operators.

### LOW-PROFILE, SIT-FLAT DESIGN

Featuring a sit-flat design, the THRILL Compact PAR 64 LED can sit perfectly flat on the ground with its cabling directed to the sides. This gives you the freedom to fit the fixture into tighter spaces, such as underneath tables or for uplighting purposes to illuminate structures at 90° with little hassle.

### SETUP IS A BREEZE

With the THRILL Compact PAR 64 LED, setup has never been easier. Layout up to 32 fixtures in a master/slave configuration and quickly daisy chain the power and data connections together. For added flexibility, THRILL Compact PAR 64 LED can be used as either a hanging fixture or a floor-standing fixture via the included multi-function bracket.

### ADDED COLORS AMBER & UV

Not all lights are created equal. With the THRILL Compact PAR 64 LED we decided to up the ante by offering additional LED emitters so that you can be more creative. We have added amber and UV LEDs that truly punch. The amber LEDs spread a nice warm front light for illuminating your presenters or band members, while the UV filter ensures that the party can keep glowing all night.
