

UNI FOG DMX

PSHATM140

Are you looking to add some extra atmosphere to your next event or performance? Look no further than our variable-angle fog machine. With a range of 180 degrees, you can adjust the angle to perfectly suit your needs. Simply loosen the bilateral knobs, adjust to the desired angle, and tighten them back up.

Not only can you set this machine up on a surface or hang it high, but it also features immediate-stop patent technology to prevent excess fog spraying. And if you need even more fog power, just turn on the Turbo temperature Select Switch. But be sure to turn it off when you're done to avoid any unnecessary noise or spray.

Combine multiple machines for an even more impressive effect, similar to the CO2 on stage. Don't settle for a lackluster event or performance - add some extra ambiance with our variable-angle fog machine.
