GENERAL INSTRUCTIONS

1. Not for residential use.
2. These fixtures must only be serviced by a qualified technician.
3. In addition to the instructions indicated on this page, relevant health and safety requirements of the appropriate EU Directives must be adhered to at all times.
4. This fixture is in compliance with section 17 - Lighting appliance for theatre stages, television, cinema and photograph studios.
Standards NF EN 60598-1, NF EN 60598-2-17, Low Voltage Directive 2014/35/UE & EMC Directive 2014/30/UE.
5. This fixture is rated as IP20, and is for indoor use only.

FIXTURE

6. Ensure fixture is correctly mounted on an appropriate support.
7. Protection screens and lenses must be replaced in the event of any damage, such as cracks or deep scratches, since these might reduce performance.
8. When hung or flown the fixture must be secured by an additional hanging accessory (such as a safety cable or bond) of suitable length.
9. Safety bonds or cables must be securely attached to the back of the fixture and be as short as possible, or rolled up as necessary, to minimise travel distance should the fixture be dislodged.
10. Movable accessories (scroller, etc.) must also be secured with a suitable safety cable or bond at the front of the fixture.
11. The combined weight of both the fixture and the accessories must be considered when choosing the load-bearing capability of safety cable or bond.
12. Do not open lighting fixture when the source is on.
13. WARNING: LED source become hot during use. Allow fixture to cool before servicing.
14. Do not tamper with design of fixture nor any of its safety features.
15. Tighten electrical mains cable connections regularly and replace with one of identical specification if damaged.
16. Use only with correct power supply.

VENTILATION

17. Keep well away from flammable material.
18. Not for outdoor use. Do not cover. Do not permit fixture to get wet.
19. To avoid overheating, do not obstruct air vents.
20. Ensure any cooling fans are in correct working order. If fans are not working, turn fixture off immediately and service as necessary.

CLEANING

21. Do not touch the LED source with your fingers.
22. To clean the optical parts, use a soft cloth in combination with distilled water or isopropyl alcohol recommended for coated optics. Do not use any cleaning product that contains solvents or abrasives, as these can cause surface damage. Dry with a soft lint-free cloth.
23. Regularly remove dust with a soft lint-free cloth.
24. If the fixture has filters, they must be cleaned frequently.

POWER SUPPLY

25. Disconnect from the mains before servicing.
26. Mains connection only. Do not connect to "electronic output" such as dimmer.
27. Ensure power supply circuit breakers, always remain accessible.

PLEASE NOTE

This product has been built to conform to European standards relating to professional lighting equipment. Any modification made to our products will void the manufacturers' warranty.

Risk group 2. Luminaires should be positioned so that prolonged staring into luminaire at a distance closer than 2.7 m is not expected.

Photobiological safety according to EN62471

2.1 Functions

Description	
1. Yoke	15. Data connectors (IN and OUT)

2.3 Accessories included

	Reference	Description
1	CAL03	3 meter power cable (3G1,5 HO7RNF) with Neutrik PowerCon® True1 TOP and CEE 7/7 (2P+T NF/SCHUKO) connectors (standard version)
2	CAL04	1,50m power cable UL/CSA with Neutrik® powerCON TRUE1 TOP connector (North American version)
3	DN41242200	Quick Start manual
4	PF1011	Ø210 mm metal filter holder (x6)
5	SGUP2	Universal "A" size gobo-holder (metal & glass)
6	VDM100	Ø100 mm frosted glass with holder
7	M270/2B	6-way "boomerang" colour changer

2.4 Accessories

EN

	Reference	Description
1	JPP	Monopod stand for overhead followspot
2	GT4000	Tripod stand with safety chain - SWL: 130 Kg - max. height: 1030 mm
3	GT4000S	Tripod stand without safety chain - SWL: 130 Kg - max. height: 1030 mm
4	GT4000R	Tripod stand with ball head rotation with security chain - SWL: 130 Kg - max. height: 1030 mm
5	T4000	Followspot mount for Ø50 mm pipe (suspension or overhead) - SWL= 100 Kg
6	VD120	120 x 120 mm frosted glass
7	FCM100R	Ø120 mm 1/2 CTO correction filter (Rosco #3408) with holder
8	M270/2TM	6-way "Push/Pull" colour changer
9	KIT TELRAD	Telrad followspot sight with raiser and universal mounting kit
10	SDUP	Followspot cue sheet holder with universal mounting kit
11	FC1189/S	Flight-case for LLT range / GT stand / accessories
12	GT4000RSM	Tripod stand with safety chain - SWL: 130 Kg - max. height: 1030 mm (equipped with PAN sensor)
13	PSA1	Support plate for 2x P1FE and 1/4" accessories
14	SMS	SpotMe server + 2 sensor cables + flight case
15	T4000RSM	Followspot mount with ball head rotation and SpotMe PAN sensor SWL = 100 Kg - Weight: 8,83 Kg
16		Horizontal chopper
17	FRO/SMCPD	Heavy duty adjustable yoke equipped with TILT SpotMe sensor (C type)
18	TCSM	SpotMe calibration tool kit
19	MAESTRO	Maestro server for SpotMe - rackable unit: 1U - half 19"
20	PCP1716A	16A blue 2P+E 6h IEC60309 power connector (option)
21	R-DISPE1	Remote display - Ethernet connector
22	P1FE-R1	One-function remote controller (with rotary potentiometer) - Ethernet connector
23	P1FE-L1	One-function remote controller (with linear potentiometer) - Ethernet connector
24	BK1	Followspot balancing kit (including 1 Kg counterweights) - Weight: 2.05 Kg
25	DMXcat	Bluetooth DMX/RDM Multifunction test tool - City Theatrical DMXcat®

3 Set-up

EN

3.1 Mechanics

3.1.1 Operating positions

3.1.2 Minimum distance between a flammable material and the lighting unit

3.1.3 Instructions for use

3.1.4 Lifting

• Net weight:
39 Kg (116.6 lbs)

Lifting ring DIN 580 M8
(x4 Not supplied)

3.1.5 Safety cable

• Safety cable attachment point

Safety cable not supplied.

The unit must be installed only on a Robert Juliat compatible stand / head :

JPP	Monopod stand for overhead followspot
GT4000	Tripod stand with safety chain - SWL: 130 Kg - max. height: 1030 mm
GT4000S	Tripod stand without safety chain - SWL: 130 Kg - max. height: 1030 mm
GT4000R	Tripod stand with ball head rotation with security chain - SWL: 130 Kg - max. height: 1030 mm
T4000	Followspot mount for Ø50mm pipe (suspension or overhead) - SWL= 100 Kg
GT4000RSM	Tripod stand with ball head rotation with safety chain and SpotMe PAN sensor - SWL: 130 Kg - max. height: 1030 mm
T4000RSM	Followspot mount with ball head rotation and SpotMe PAN sensor - SWL= 100 Kg

• GT4000 / GT4000S / GT4000R

Please refer to the relevant stand technical files for further details.

3.2 Electrical information

3.2.1 LED source

Never touch or scratch the LED surface.
See 6.1.4 LED source.

3.2.2 Power supply

Power supply			
Voltage	Frequency	Input power	Connectors
90 → 277 V	47-63 Hz	4,39 A / 958 W @ 230 V 9,27 A / 990 W @ 120 V 10,31 A / 1000 W @ 100 V Max. = 12 A Standby < 11 W	Neutrik powerCON TRUE1 TOP Input : ref. NAC3FPX-TOP
 • Class 1 product. This luminaire must be earthed. • Must be connected directly to AC power. Do not connect to dimmer power. • Automatic mains voltage detection.			
Daisy chain (with delivered power cable):  Maximum : 3 units @ 230 V 1 unit @ 120 V 1 unit @ 100 V

➔ selection in SETUP / DIMMER / CURVE menu: LINEAR or SQUARE

4.1.3.3 Master control

➔ DMX Mode 3 & 4

In order to supervise the operator from the console, master control DMX channel can be used.

This channel limits the maximum value of the dimmer shutter.

By using this function, it is possible to obtain synchronised fades with several spots or to give intensity limits (minimum and maximum) to the operator.

Master is only active when DMX is detected.

➔ Selection in SETUP / DIMMER / MAX menu

4.1.3.5 Dimming mode

➔ Selection in SETUP / DIMMER / DIMMING MODE menu

“Home values” represent a selection of values manually entered into the device via the keypad to produce a defined state.

These Home values can be set in the following modes:

Parameters / control modes:	DMX - Dimmer mode (mode 1)	DMX - Profile mode (mode 2)	Followspot 16B	Followspot 16B Iris	Standalone*
Dimmer	DMX	DMX	DMX	DMX	HOME VALUE
Strobe duration	NA	DMX	DMX	DMX	NA
Strobe speed	NA	DMX	DMX	DMX	NA
Responsive time	HOME VALUE	DMX	DMX	DMX	HOME VALUE
Iris	HOME VALUE	HOME VALUE	HOME VALUE	DMX	HOME VALUE
Iris Mode	HOME VALUE	HOME VALUE	HOME VALUE	DMX	HOME VALUE
Dimmer Master	HOME VALUE	HOME VALUE	DMX	DMX	HOME VALUE

If the function is not controlled by DMX, the Home value is automatically activated.

HTP mode between DMX, local and HOME VALUES

(*) Defines a standalone operating mode in the following cases:

- As default values when used without data Data mode → Protocol → Standalone
- As reference values following a data signal loss. Set up → Data set up → DMX hold → Standalone

5.4 Network

Our network stack can handle several flows of protocol at the same time.

Protocol always available:

- Web page to set up parameters - *See section 5.4.4*
- LLRP (Low Level Recovery Protocol) for IP network configuration - *See section 5.4.5*

A selection of Protocols dedicated to lighting:

- Art-Net V4 - *See section 5.4.1*
- sACN - *See section 5.4.2*
- Dual: Sacn + Art-RDM (DMX512 data signal + RDM) - *See section 5.4.3*

From July 2024 the Robert Juliat equipment based on RJ LED2 platform is configured as follows:

- DHCP (**D**ynamic **H**ost **C**onfiguration **P**rotocol - **RFC1531**) ON
→ <https://www.rfc-editor.org/rfc/rfc1531>
- Zeroconf (**Z**ero-**c**onfiguration **n**etworking – **IPv4LL/APIPA – RFC3927**) ON
→ <https://www.rfc-editor.org/rfc/rfc3927>

IP Addressing of Parameters

Default:

- At startup, the device's IP address is set to 000.000.000.000 with a subnet mask of 000.000.000.000
- After connecting to the network, the device awaits the assignment of an IP address and subnet mask by the DHCP server.
- If there is no DHCP server, a unique IP address and subnet mask are automatically assigned.
IP : 169.254.XXX.XXX Mask : 255.255.0.0

Most personal computers are configured with DHCP and Zeroconf enabled, so the IP address defaults to 169.254.X.X with a subnet mask of 255.255.0.0.

When connected to a Robert Juliat device, since the IP address/mask range are in the same class, network communication works seamlessly.

This configuration was chosen to make it easier for non-IT technicians.

Static IP;

It's possible to configure a static IP address, but be sure to select a unique IP address with the correct subnet mask.

Configuration can be done via the Web Page, RDM, LLRP, Art-Net, or locally.

Default IP Address:

When DHCP mode is OFF and no static IP address has been selected, the device will default to a Class A IP address of 2.XXX.XXX.XXX with a subnet mask of 255.0.0.0.

This address can be found on a label near the ID plate or by pressing the right arrow on the local control.

Default Settings:

DHCP = OFF

Address = 2.XXX.XXX.XXX

Mask = 255.0.0.0

Changing the Controlling Computer's IP Address:

- The IP address and subnet mask of both the fixture and the computer must be on the same network class.
- The computer's IP address must be different.
- Refer to your operating system's support to modify IPv4 settings:

Change your IP address on Windows

➔ <https://support.microsoft.com/en-us/windows/change-tcp-ip-settings-bd0a07af-15f5-cd6a-363f-ca2b6f391ace>

Change your IP address on Mac

➔ <https://support.apple.com/en-ae/guide/mac-help/mh14129/mac>

Example: Using the fixture's default IP address

1 - Computer IP address: 2.2.2.2

2 - Computer subnet mask: 255.0.0.0

5.4.1.1 Protocol

Artistic Licence Art-Net v4.

For more information about Art-Net protocol: <http://art-net.org.uk/>

5.4.1.2 Configuration

Set mode through Web interface
(see 5.9 Web interface)

Set mode through RDM
protocol

Local control

- 1 - If necessary, change IP settings
- 2 - Set Art-Net Universe
- 3 - Set DMX address
- 4 - Set personality mode (see 5.2.4. DMX chart)

**Caution:**

(*) Activate Art-Net in protocol mode beforehand.

5.4.2.1 Protocol

ANSI E1.31 – 2009 sACN (Streaming-ACN)

5.4.2.2 Configuration

Set mode through Web interface
(see 5.9 Web interface)

Set through local control

- 1 - If necessary, change IP settings
- 2 - Set sACN universe
- 3 - Set DMX address
- 4 - Set personality mode (see 5.2.4. DMX chart)

5.4.3.1 Protocol

Dual Mode: Available only on an Ethernet network

It allows to send a DMX 512 signal through a sACN data stream and at the same time to use an Artnet/ArtRdm data stream to control, set and monitor the equipment via RDM.

This mode can be set by Web interface or the local control screen.

5.4.3.2 Configuration

Set mode through Web interface
(see 5.9 Web interface)

Set through local control

- 1 - If necessary, change IP settings
- 2 - Set DUAL universe
- 3 - Set DMX address
- 4 - Set personality mode (see 5.2.4. DMX chart)

5.4.4.1 Control

The fixture must be connected to a compatible network or directly linked to a computer with an RJ45 Ethernet cable.

The fixture's IP address: *see section 5.4. Network*

5.4.4.2 Connection to the Web interface

- 1 - Open a web browser (Microsoft Edge, Firefox, Apple Safari...)
- 2 - Enter the fixture's IP address in the browser's address bar
 - "00X" is read as "X".
 - Never type a zero (0) before the numbers XX or X (*see 5.4.4*)
- 3 - The HOME page will appear, and all settings can now be viewed and modified.

HOME Page

DATA MODE Page

SETUP Page

EXPERT Page, password-protected (1280).

NODE Page

UID* list of devices detected by RDM on the DMX OUT link;
the first UID is the fixture.

(*) UID : RDM Unique Identifier

5.4.5 LLRP (Low-Level Reader Protocol)

LLRP is a multicast protocol that facilitates basic IP configuration. It is part of the ESTA E1.33 RDMnet standard.

LLRP can be used for the initial configuration of networked equipment. It provides a low-level mechanism for discovering and configuring the network parameters of devices, including IP settings and basic RDMnet configuration settings.

LLRP Targets expose these parameters for configuration and respond to discovery requests from LLRP Managers. Once an LLRP Manager discovers one or more LLRP Targets, it can use LLRP to send RDM commands to retrieve or modify these parameters.

A SOLUTION FOR INCORRECT OR UNKNOWN IP CONFIGURATION

Network connectivity issues are often caused by misconfigured network addresses, with improperly configured subnet masks being the most common problem.

LLRP uses two multicast IP addresses, enabling communication even when all other network communication has failed.

Since multicast addresses are unaffected by a misconfigured subnet mask, LLRP provides an efficient and reliable solution to recover from network misconfiguration.

In summary, LLRP simplifies the process of identifying and configuring the IP addressing of LLRP-compatible devices on your network.

All Robert Juliat equipment based on the RJ LED2 platform includes LLRP functionality.

Two LLRP Manager software tools are available for free:

- DMXworkshop by Wayne Howell from Singularity (UK): <https://singularity-uk.com/product/dmx-workshop/>

- CLU/Netron from Obsidian : <https://obsidiancontrol.com/netron-clu>

5.5 Fan cooling modes

5.5.1 Range

Mode	Fan Speed 
SILENT	Minimum – constant speed
NORMAL	Regulated – depending on ambient temperature
FULL	Maximum – constant speed

5.5.2 Control

→ selection in SETUP / CONTROL

Function	Parameters	Description
Rotation		Normal (CW): Clockwise Invert (CCW): Anticlockwise
Calibration		Adjust to the minimum position Adjust to the maximum position

6.1 Preventive maintenance

6.1.1 Frequency

General maintenance should be performed at least once a year or more frequently if the equipment is operated in adverse conditions (smoke, heat, humidity, touring, etc.).

6.1.2 General cleaning

Remove dust from the unit.

6.1.3 General visual check

- No trace of heat.
- No loose contacts.
- No missing parts.
- Tighten mechanical assemblies (screws, bolts and nuts, etc.).

6.1.4 LED source

- Do not touch the surface of the LED source (no contact with your hands or any tools).
- Do not put compressed air directly on the source.
- Contact a certified RJ distributor in case of residuals or other objects located on the surface of the LED source.

6.1.5 Optics

Only use solutions containing alcohol to clean optical parts (lenses).

- To clean the optical parts, use a soft cloth in combination with distilled water or isopropyl alcohol recommended for coated optics. Do not use any cleaning product that contains solvents or abrasives, as these can cause surface damage.
- Dry with a soft lint-free cloth.

Removing the LED housing cover: 1 → 2

In case of problem, contact RJ distributor with the following information:

- Model, version and serial number of the product.
- From the menu status:
 - Software version
 - LED board IDs
 - Device hours
 - Picture of the Selftest Report (Cf. section 6.6 Selftest)
- Description of the problem.

6.3 Electronic thermal management system

In case of overheating, light intensity will be reduced by the system.

“Power reduction X%” will be shown on the display with the reducing percentage.

6.4 Firmware update

1. Firmware available on www.robertjuliat.com/followspots/Tristan
2. Download and unzip the file

There are 4 files:

- Firmware (.upd2 format)
- Firmware history
- Update procedure
- User manual from firmware version V4.0x onwards

3. Switching on the lighting fixture
4. Connect Network from computer to the fixture
5. Open a Web browser (Microsoft Edge, Firefox, Apple Safari....)
6. Enter the fixture's IP address in the browser's address bar.

- “00X” is read as “X”.
- Never type a zero (0) before the numbers XX or X (**see 5.4.4**)

7. Upload your firmware file (.upd2)

In the “Update firmware” window, select the update file and click on “Submit firmware”.

6.5 Factory defaults

Select **FACTORY DEFAULT** in the main menu to reset all values and parametres

Set to factory defaults /
reset through web interface
(Home page)

Set to factory defaults /
reset through RDM protocol

Set to factory defaults /
reset through local control

6.6 Selftest

Select **SELFTEST** in the STATUS menu :

Press OK
to start
SELFTEST

At the end of each test, a **PASS/FAIL** message will be displayed.

If the DMX and network functions need to be tested, the system will prompt you to perform certain operations.

test report: Fail				P=Pass F=Fail			
fans	P	pow	P	temp	P	dmxi	P
dmxo	F	net	F	drv	P		

Test Report

An "F" (FAIL) or "P" (PASS) will be displayed at the end of the self-test (SELFTEST).

If the problem persists, please take a photo of the test result and send it either to your Robert Juliat dealer or to the Robert Juliat After-Sales Service, if requested (email: service@robertjuliat.fr)
