1. SAFETY INFORMATION

1.1. General Preventive Measures

- 1.1.1. Please read, understand and follow the instructions.
- 1.1.2. Store the instructions and information in a safe place.

 Best solution is the ring binder provided by ROXX.
- 1.1.3. Follow all safety warnings. Under no circumstances remove safety warnings or other information from the equipment.
- 1.1.4. Don't use the equipment for any other intended purpose or manner.
- 1.1.5. Use only stable and compatible stands and/or brackets. Especially when fix installed.

 Make sure the wall brackets are properly installed and safe. Make sure the device is securely installed and cannot fall.
- 1.1.6. Check the safety regulations applying for your country before and during installation.
- 1.1.7. Keep the device away from heat! Don't place/install near heaters, ovens or any source of heat. Make sure that the device always is efficiently cooled and cannot overheat.
- 1.1.8. Always guarantee that ventilation and cooling slots are clean and not blocked.
- 1.1.9. Item must be away minimum 20cm from anything around and above it.
- 1.1.10. Do not use this device close to water.
- 1.1.11. Do not expose this equipment to flammable materials.
- 1.1.12. Make sure that no objects can fall into the device.
- 1.1.13. Only use this device with the accessories recommended by the manufacturer.
- 1.1.14. Always check the equipment for housing damages, so that no water can enter the device.

 No containers containing liquids of any kind should be place on top of the unit.
- 1.1.15. Opening or modifying this device is only allowed by authorized and qualified persons.
- 1.1.16. All cables need to be checked after connecting the device in order to prevent damage or accidents.
- 1.1.17. Make sure that the device is transported safe and packed proper in order to prevent damage of any kind.
- 1.1.18. Once you notice improper function of your device due to damage, electric shock or anything similar, immediately unplug the unit from the mains outlet and contact our service department.
- 1.1.19. Clean the device with a dry cloth.

- 1.1.20. Observe all disposal laws applicable in your country. Especially for the packaging.
- 1.1.21. Plastic bags are not a toy! Keep away from children!
- 1.1.22. Please note that changes or modifications which are not approved by the party responsible for compliance will void the user's authority to operate the device.

1.2 Regulations for equipment that connects to power mains

- 1.2.1. If an earthing contact is available in the used power cord, it must used in combination with an power outlet, providing a protective ground. In no circustances should the protective ground be deactivated.
- 1.2.2. Do not switch on the device immediately after it has been in strong different temperatures, especially after transport. Let the device acclimatize to the temparature in the room of usage first to prevent moisture and condensation.
- 1.2.3. Verify that the correct voltage and frequency are available in the area of operation, before connecting the unit to the mains outlet.
- 1.2.4. If the plug doesn't fit in your mains outlet, contact your electrician.
- 1.2.5. Make sure your power cord/adapter/connector does not show signs of kinks/warps or is being stepped on.
- 1.2.6. Allwas disconnect the unit when not in use or being cleaned. Don't pull on the cord to disconnect. Only touch power connections with dry hands!
- 1.2.7. Don't switch the unit on/off rapidly. This may cause damage.
- 1.2.8. If a fuse needs to be replaced, ALWAYS make sure that exact the same fuse will be used (type and rating). Repeatedly blown fuses need to be checked by an authorised service technician.
- 1.2.9. In the risk of lighting strike all units need to be unpluged from the mains in order to prevent damage.
- 1.2.10. During installation there must be a voltage free condition.
- 1.2.11. The device needs to be cleaned and serviced regularly and will credit this with a longer life cycle. Dust, dirt, moist, water, smoke, nicotine or anything similar inside the unit will cause damage/malfunction.
- 1.2.12. The unit needs to have at least 0,5m distance to anything flammable.
- 1.2.13. You have to make sure that any electrical installation applys to the laws of your country. Correct power cables and applying standards have to be used.

1.3. Technical warnsigns and explanation

In order to prevent the risk of an electric shock, under no circumstances remove the cover/back or open the unit in any way! No user serviceable parts are inside. Service, maintenance and repairs should only be done by qualified service personnel or the manufacturer.

Dangerous uninsulated voltage inside the device can cause an electrical shock when opened by unqualified personnel.

Important operating and maintenance instructions apply!

Do not operate this device in tropical climates.

CAUTION! Intense LED light source! Risk of eye damage. Do not look into the light source

The housing surface of the spotlight can heat up to temperatures as high as 70 °C in regular use. Ensure that it is not possible to come into contact with the housing unintentionally. Always allow sufficient time for the lamp to cool down before dismantling, carrying out maintenance work or charging etc..

IMPORTANT IMFORMATION!

- This is a product which has been developed for professional usage in event technology. It is not suitable as a houshold lighting.
- NEVER stare, not even temporarily, directly into the light source.
- Don't use magnifiers or any other optical instrument to look at the beam.
- The effects of this device, expecially the stroboscope effect, can cause problems for sensitive people or may even cause epileptical seizures.

Fully charge the battery again immediately after discharging. Batteries that are not fully charged lose capacity and service life. For short to medium-term storage of the headlamp, fully charge the battery. If the headlamp will not be used for a longer period of time, use the "Storage" function inside the device settings to charge the battery.

This limits the maximum charging capacity to 40% and thus preserves the life of the battery. Do not charge the battery of the NEO lite headlamp at ambient temperatures below 0° C / 32° F and above 40° C / 104° F.

If the headlamps are charged inside a flightcase, the case lid must remain open during the entire charging process in order to avoid heat accumulation.

1.4. Battery Safety

- **1.** Keep the battery poles away from conductive objects, such as keys, jewelry, or other materials. Otherwise, the battery may be short-circuited, resulting in injury and burns.
- 2. Never change the polarity of the battery's contacts.
- **3.** Keep the battery away from excessive heat and direct sunlight. Do not place it on or in heating devices, such as microwaves, ovens, or radiators. Batteries may explode if overheated.
- **4.** Do not attempt to modify or rework the battery, insert foreign objects into the battery, or immerse the battery in water or other liquids.
 - Do not attempt to modify or rework the battery, insert foreign objects into the battery, or immerse or come into contact with water or other liquids. Failure to do so may result in fire, explosion, or other hazardous dangerous situations.
- **5.** In case of battery acid leakage, make sure that it does not get on the skin or in the eyes. if it does, rinse immediately with clean water and consult a doctor.
- **6.** In case of deformation, color change or overheating of batteries during charging or storage, stop using the device immediately. Immediately stop using the device and remove the battery. If you continue to use the device.
 - battery acid may leak or a fire or explosion may occur.
- 7. Do not dispose of batteries in fire as they may explode. Damaged batteries may also explode.
- **8.** Dispose of used batteries in accordance with local regulations. Improper use of the battery may result in a fire, explosion, or other hazardous situation.
- **9.** Do not allow children or pets to chew, suck or suck on the battery. Doing so may cause damage or an explosion may occur.
- **10.** Do not smash or puncture the battery and do not subject it to high pressure. Otherwise, it may cause a short circuit or overheating.
- **11.** Do not drop the device or battery. If the device or battery is dropped, especially on a hard surface, it may be damaged.
- **12.** If the standby time of the device shortens significantly, replace the battery.
- **13.** The installation or replacement of the battery is only permitted for trained personnel. Follow the provided instructions strictly. Neglect can damage the battery or cause it to explode.
- **14.** Avoid frequently discharging the battery below 20% or charging above 80%. Stick to the given temperature ranges, as this will greatly affect the battery's lifespan.

2. INTRODUCTION

2.1. About us

The name ROXX® came easily.

Combined with the concentrated knowledge and many years of experience, our three founders, who have been leaving their mark in the event and lighting industry for many years already, came together in 2020 to start this outstanding venture.

Product development, sales and marketing as well as the exceptional know-how and the profound rooting in the field of the professional lighting technology belong to our core competences and therefore guarantee extremely innovative and reliable products, excellent support and professional service in every aspect.

Designed & developed in Germany

ROXX® products are developed and designed in Germany. Always in tight consultation with our customers and experts who will eventually be working with these tools. This ensures innovative, easy-to-use and performance-oriented solutions, which provide added value for our customers.

Made to last

Recommended for permanent outdoor use, most ROXX® products feature additional corrosion protection and enhanced IP66 equipment protection, thereby providing that crucial extra for a wider range of applications. In addition to architectural or theme park applications, even fixed installations in coastal or offshore areas with high salt exposure can be reliably implemented over long periods of time.

2.2. NEO lite

Illuminate your world with NEO lite, a cutting-edge lighting fixture that combines unparalleled performance with versatility and convenience. With 10 x 20W RGBL LEDs, NEO lite generates an astounding 12.000lx @ 5m, calibrated at 5600K, ensuring your space is bathed in brilliant light. Crafted with precision, the fixture features a specially developed 8° TIR lens, ensuring high illuminance even over extended distances while guaranteeing seamless color mixing for captivating displays. Enhance your lighting setup further with optional magnetic filters, offering a range of circular and elliptical beam angles, along with a smoked clear filter tailored for impeccable camera applications.

NEO lite boasts a CRI/Ra and TLCI up to 85, ensuring accurate color reproduction that breathes life into your surroundings. Built to withstand the elements, NEO lite has a certified IP65 rating, making it suitable for both indoor and outdoor use.

The integrated CRMX transceiver and Bluetooth module offer seamless wireless DMX setup according to industry standards, along with direct control via the intuitive ROXX.APP, streamlining your workflow and enhancing efficiency. Experience hassle-free addressing and configuration with NEO lite's integrated Near Field Communication (NFC), even

Experience hassle-free addressing and configuration with NEO lite's integrated Near Field Communication (NFC), even when fixture power is not available. This innovative feature revolutionizes your daily work processes, making light setup faster, easier, and more satisfying than ever before. The specially developed copper heat pipe cooling system ensures stable luminous intensity, even in high ambient temperatures. With temperature-controlled fan modes, including fan-off mode for silent operation, NEO lite is ideal for any stage, TV, and film application. The fixture offers linear CTC control from 2000K to 10,000K, ensuring versatility for any lighting scenario. The user-friendly 2" TFT display, complemented by backlighted buttons, provides direct access to dimmer, CCT, gels, app control, and CRMX functions, simplifying operation for users of all levels.

Designed with convenience in mind, NEO lite features integrated handles on both the head and yoke, allowing for comfortable transportation. Multiple mounting locations offer creative rigging options, while 16-bit dimming control ensures smooth, perfect fades for seamless transitions. Experience seamless transitions with 16-bit dimming control, ensuring smooth, perfect fades every time. Plus, adjustable PWM frequencies up to 25kHz guarantee flicker-free operation, providing optimal lighting conditions for any shoot.

3. GENERAL PRODUCT INFORMATION

3.1. Scope of delivery

- → Power cord with plug (EU country specific, if not ordered differently)

We're offering a wide range of professional accessories (optional). Please see under chapter 6 or at our website www.roxxlight.com

3.2. Control Functions

- 3CH CCT, 3CH RGB, 6CH RGB, 8CH RGB, 11CH RGB, 15CH RGB, 4CH DIRECT, 8CH DIRECT, 9CH DIRECT, 12CH DIRECT, 17CH DIRECT, 10CH HSI
- Stand Alone Functions including cinema effects, various auto programs, customisable scenes, CCT, LEE adjusted color macros and custom color templates
- 6 extra display controls for direct access of wireless settings, dimmer, CCT, color & user definable functions
- Master & Slave (by DMX and Wireless DMX)
- Wireless DMX (Lumenradio CRMX®)
- ROXX App Bluetooth 5.0
- ROXX NFC App Near Field Communication

3.3. Features

4. INSTALLATION & SETUP

4.1 Physical Installation and Rigging

ROXX NEO lite may be installed in any orientation. For this purpose the product provides several options:

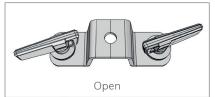

Standing:

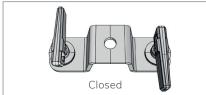

The fixture is equipped with 4 rubber feet. It allows the luminaire to be used in floor application. With its integrated rubber feet it's designed to ensure a secure stand on every plane surface with 220° tilt movement of the fixtures head.

Hanging:

On the bottom 2x Camlock 1/4 turn connnectors are installed. Here it's possible to click in the ROXX Omega Bracket ST (optional accessory) equiped with any suitable clamp.

Insert the two fasteners and turn each 90° clockwise to lock them. Please be sure that the fasterners are turned fully and snaped in.

We recommend using the holes inside the yoke to attach a safety wire.

4.2 Connections*

A: DMX IN

B: DMX OUT

C: IP65 Power In connector with rubber sealing cap.

Connect using the provided power cable (when not in use, always close with rubber sealing cap)

D: IP65 Power Out connector with rubber sealing cap.

Connect using the provided power cable (when not in use, always close with rubber sealing cap)

E: On/Off switch for battery operation

(i) *Note:

In order to provide protection from spraying water, in accordance with protection class IP65, special IP65-rated XLR connectors must be used correctly with the DMX input and output sockets, or they must be closed using the rubber sealing caps. When connected correctly, or when sealed correctly with the rubber sealing caps, the POWER IN and POWER OUT sockets are protected from spraying water, as in accordance with IP65.

4.2.1. AC Power

The NEO lite operates on any 100–260 V, 50/60 Hz AC mains power supply with a maximum power consumption of 215W. Connect the fixture to AC power using the supplied cable or a similar one with Neutrik powerCON TRUE1 NAC3FX-W or a compatible type, to ensure the correct ingress protection (IP).

For temporary installations, the mains cable must be fitted with a grounded connector intended for exterior use. The fixture must be grounded/earthed and be able to be isolated from AC power. The AC power supply must incorporate a fuse or circuit breaker for fault protection.

| Wire Color (EU models) | Wire Color (US models) | Conductor | Symbol |
|------------------------|------------------------|----------------|--------------|
| Brown | Black | Live | L |
| Blue | White | Neutral | N |
| Yellow / Green | Green | Ground (earth) | ⊕ or <u></u> |

Warning!

Read "Safety Informations" starting on page 3 before connecting the fixtures to AC mains power! Do not connect the fixture to an electrical dimmer system, as doing so may cause damage that is not covered by the product warranty!

4.2.2 DMX Connection

The NEO lite is fully controllable by DMX (USITT DMX512-A standard, based on RS-485) and RDM. It can be connected using either DMX cables or via the built-in LumenRadio CRMX wireless system.

4.2.2.1. Cable Connection

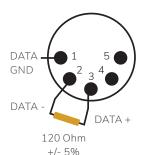

If using a cabled DMX system, connect the DMX IN cable to the input connector (male 5-pin XLR connector) and DMX OUT cable to the output (female 5-pin XLR connectors).

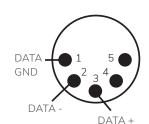

For outdoor installations, use only IP65-rated XLR connectors.

Use shielded twisted pair cable designed for RS-485 devices. The cables are daisy chained between the fixtures, and up to 32 fixtures can be connected to the same DMX link. Up to 300 meters (1000ft.) of cable is achievable with high quality DMX cables. All DMX links must be terminated in the last fixture by connecting a DMX termination plug to the last fixture's 5 pin DMX out connector.

Standard microphone cable is not suitable for transmitting DMX.

DMX Termination on last fixture DMX out

XLR pin out

4.2.2.2. Wireless Connection*

NEO lite is equipped with a LumenRadio ™ Transceiver module.

This enables the fixture to work with the following connectivity options:

- → Working in Receiver Mode: receive wireless DMX- and RDM Signals via CRMX
- Working in Transmitter Mode: transmit DMX (1 universe) to other units via CRMX
- ⊕ Full Control via Bluetooth 5.0 and ROXX App

The Fixture is able to send DMX-data received by CRMX or Bluetooth to its physical DMX-Output XLR Connector and hereafter, plugged in by cable, to any DMX-capable unit. For this please enable "Pass to DMX Out" inside Wireless DMX Settings.

NEO lite can act as a fully operative CRMX Receiver and be paired to an active wireless transmitter (CRMX) simultanously as being connected to a cabled DMX. The device will prioritize cabled DMX input over wireless DMX and over Bluetooth. A small indicator infront of "DMX", "CRMX" or "BLE" gives an easy overview which protocol is curently active. Please see the display graphics below.

If using a wireless DMX system, ensure that the DMX input and the DMX output are properly sealed. Connect both DMX IN and DMX OUT, or seal, in order to maintain the fixture's IP65 rating.

① *Note: If you are using XLR for DMX and not Bluetooth we recommend to not connect to Bluetooth unless you need to since it can cause a few dropped DMX packets.

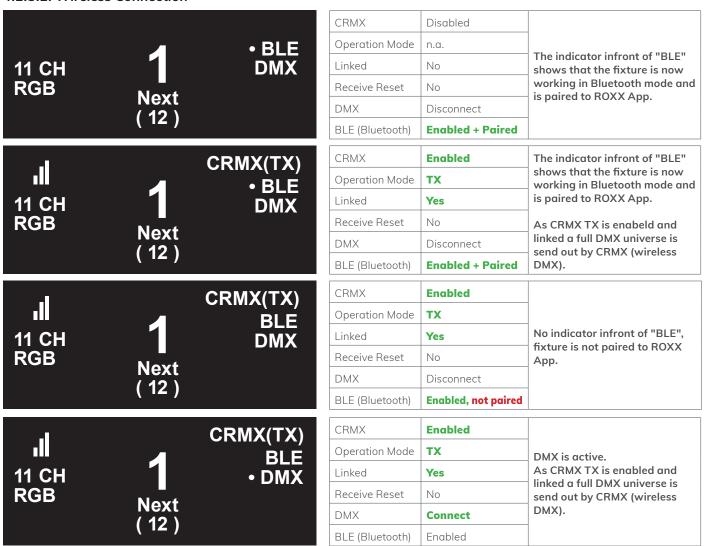

BLE and CRMX RX are not available simultaneously.

- If CRMX RX is enabled and BLE will enabled after, CRMX automatically changes to TX mode.
- If CRMX TX operating mode is changed to RX, BLE will be disabled automatically.

4.2.2.2. Wireless Connection

| 4.2.2.2. Wireless | Connection | | | | |

4.2.3.2. Wireless Connection

4.3. NFC (Near Field Communication)

NEO lite integrates a NFC chip (Near Field Communication) and allows in conjunction with ROXX NFC App to address and configure the fixtures wirelessly even when the fixture power is not prevent. Additionally, the fixtures firmware can be read out and updated to latest version. For this please make sure NEO lite stays AC powered during update process.

The NFC chip is based on it's lower housing part, close to the CRMX antenna. To get a proper connection between your mobile phone and NEO lite, please make sure that your phone is very close to the NFC.

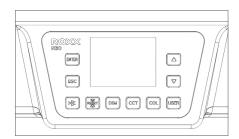

5. OPERATION

5.1 Start up*

Once the fixture is connected to AC power, the boot process starts and the following information will appear on the display:

"Ready to ROXX", the product name and the current software version.

After this process, the fixture is ready for operation, and starts in the previously enabled mode.

i *Note:

During boot process the fan spins up quickly to blow out some possible dust from last use.

5.2 Control Display*

2.0" TFT Display with ten backlighted control buttons

Press ENTER to access the selection menu for system settings or confirm changes.

Press ESC to take a step back in the menu.

Press arrows to scroll up and down inside the menu and change values, such as DMX address.

① *Note:

After approximately 1 minute of inactivity inside the menu settings, the display will automatically jump back to home screen.

5.3 Display Short Cuts*

Short Cuts

For some always recurring functions the fixture allows quick and user-friendly access at home screen over some display control short-cuts:

User Reset or Factory Reset*

Pressing ESC+ENTER simultaneously a Factory Reset or User Reset can be started.

By using the up/down arrows the Factory- or User Reset can be selected.

For confirming press ENTER, to jump back please press ESC.

(i) *Note:

For detailed information about the different reset options please refer to chapter "5.4.6.1 Reset functions"

Display Off

Pressing ESC + arrow down simultaneously the display backlight function will set to off and the display will turn off immediately. Once a control is pressed the display backlight will turn on.

Manual display flip function*

The fixture includes an auto display flip function by default.

To use the manual display flip function please disable the auto flip function under Settings / Display first. Once the auto display flip function is disabled you can use the manual display flip function by pressing arrow up + arrow down simultaneously. The display will rotate 180 degrees. By pressing both arrows simultaneously again the display will flip back.

(i) *Note:

Once the display is flipped both Up / Down controls will work according to the display rotation.

5.4 Configuration

Home Screen

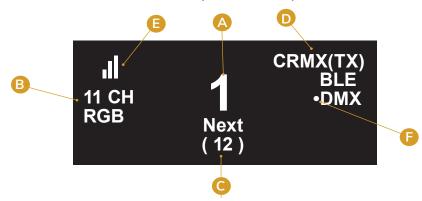

After boot process the fixture is ready for operation and starts in the previously enabled mode. At home screen the following information will appear, depending on the current operating mode:

- A DMX Adress
- **B** Operating Mode (DMX Mode, Quick Light or Standalone Mode)
- C Next available DMX address depending on the fixtures DMX footprint
- D External Data protocol (CRMX, DMX, BLE).
- E CRMX status and strength
- **F** The dot indicates the active protocol

Note: CRMX (RX) CRMX Receiving Mode CRMX (TX) CRMX Transmit Mode

BLE Bluetooth enabled

5.4.1 Set DMX Start Address (Direct Access)

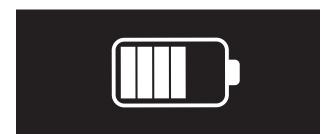

At Home Screen the DMX address can be changed directly by using the up and down arrows. During this process the DMX address starts blinking, once it's confirmed by pressing ENTER it stops blinking.

If the DMX address will not be confirmed by ENTER within 10 seconds, the display will jump back and show the DMX address from before and stops blinking.

5.4.2 Battery Charge Status

To recharge the internal battery, connect the fixture to mainspower. The battery charge status is indicated by the battery symbol on the display in Standby Mode. Once the fixture is switched On, the battery status will be also displayed in percentage.

5.4.3 Selecting DMX Mode*

At home screen please press ENTER to access to the main menu (level 1). While using UP / DOWN arrows, please select the menu item "DMX Mode" and confirm by pressing ENTER. In the following sub-menu (level 2), you can now choose between 16 different DMX operating modes while using the UP/Down arrows and confirm by pressing ENTER or jump back by pressing ESC. After confirmation the display will jump back to main menu (level 1). Press ESC for homescreen, here the selected DMX mode will be displayed.

*Note: For detailed information about the several DMX modes including channel assignment please see our DMX Control chart.

17

Level 1 Level 2

DMX Mode Menu ■ DMX Mode → 3CH CCT Stand Alone 3CH RGB Slave 6CH RGB 8CH RGB Settings System Info 11CH RGB 15CH RGB **4CH DIRECT 8CH DIRECT** 9CH DIRECT 12CH DIRECT 17CH DIRECT 10CH HSI

5.4.4 Stand Alone*

Press ENTER to access to main menu (level 1).

While using the UP / DOWN arrows, please select the menu item "Stand Alone" and confirm by pressing ENTER.

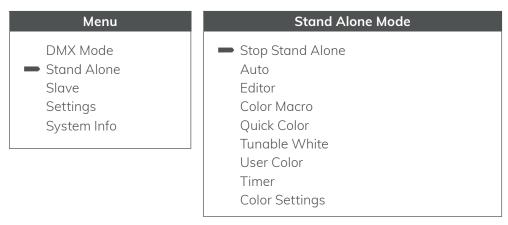

In the following sub-menu (level 2), you can now choose between 6 different Stand Alone operating modes (Auto, Editor, Color Macro, Quick Color, Tunable White, User Color) ,Stop Stand Alone, Timer and Color Settings functions while using the UP/Down arrows and confirm by pressing ENTER or jump back by pressing ESC.

To finally use Stand Alone programs please make sure either DMX, CRMX RX or BLE is connected to the fixture, as these protocols have priority.

Stop Stand Alone

To stop a running Stand Alone mode immediately, please select "Stop Stand Alone" and confirm by pressing ENTER. The display will automatically jump back to level 1.

Level 1 Level 2

Auto*

Select "Auto" by using the up/down arrows and press ENTER.

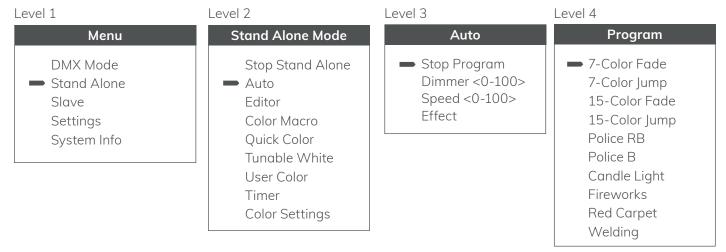

Here at sub-menu (level 3) you can stop the effect and set the general speed and brightness of the effect.

To adjust speed, please use the UP / Down arrows to select the menu item "Speed" and confitm with ENTER. After that use Up / Down arrows to adjust the speed value between 000-100 anf confirm by ENTER or jump back by ESC. To adjust brightness please select "Dimmer" as per the procedures previously described and confirm with ENTER. After that use Up / Down arrows to adjust the brightness value between 000-100 and confirm by ENTER or jump back by ESC.

Selecting "Effect" brings you to level 4. Using the Up / Down arrows you can select one of the 10 auto programs and confirm by pressing ENTER or step back by ESC.

Once it's confirmed or denied the display will automatically jump back to level 3. To stop running a selected auto program please chose "Stop Program" at level 3 or "Stop Stand Alone" at level 2. For returning back to homescreen please press ESC three times. At homescreen the selected Stand Alone mode "Auto" and the selected program will be displayed.

①*Note: Using arrows UP/DOWN at homescreen Auto programs can be directly changed according to the list.

Editor*

At Editor you have up to three customizable programs which can be defined and run from the menus.

Each of the three values contains twenty four user-definable scenes with its own values for RGBL (RAW) or RGB (Calibrated) and shutter, playing continuously in a loop. Each scene has a definable fade-in time for the transition from one color to the other and wait-time.

To define a program please press ENTER to access to main menu (level 1).

While using the UP / DOWN arrows, please select the menu item "Stand Alone" and confirm by pressing ENTER.

Level 1 Level 2

| Menu | Stand Alone Mode |
|--|---|
| DMX Mode Stand Alone Slave Settings System Info | Stop Stand Alone Auto Editor Color Macro Quick Color Tunable White User Color Timer Color Settings |

Select "Editor" by using the up/down arrows and press ENTER.

Here at sub-menu (level 3) you can choose between Program 1-3, Dimmer and Stop Program. Using the Up/Down arrows you can select program 1, 2 or 3 and confirm by pressing ENTER or step back by ESC. After confirming your preferred program, you can now choose between Scene 1-24. Select one of the scenes and press ENTER or step back by ESC. At level 5 you can now set your color, shutter and fade / wait time in minutes and seconds. For creating a color jump please set value for "Fade Time" to 0, and "Wait Time" to at least 1 second.

Once it's set your first scene is programmed.

You can now jump back to level 3 by using ESC. Here your program will starts automatically. For creating more scenes please use the same procedure. To stop an active program please press ESC and select "Stop Program" at level 3 or "Stop Stand Alone" at level 2. To start again, please re-select your preferred program, it will starts automatically again. To adjust the master brightness for program 1-3, you can use the item "Dimmer" at level 3 and select between 000-100 and confirm by ENTER or jump back by ESC.

① *Note: Once "Factory Calibration" is selected under "Color Settings" inside Stand Alone, only values for RGB are available here.

Using UP / DOWN arrows at homescreen Editor program can be directly changed according to the list. For choosing the right strobe effect please follow the Strobe Channel from our DMX chart at the end of this manual.

| | | | | | |

To adjust your Quick Color please press ENTER to access to main menu (level 1).

While using the UP / DOWN arrows select the menu item "Stand Alone" and confirm

by pressing ENTER. After please select the item "Quick Color" by using the up/down arrows and press ENTER again. Using UP and DOWN controls, select your desired color and confirm with ENTER.

After you can adjust the brightness for the color between 000-255 and confirm by ENTER.

Besides the individual color mix also a master dimmer can be adjusted between 000-100.

For strobe effects please adjust the Shutter value between 000-255.

(i) *Note: Please see detailed explanation for strobe effects inside DMX chart at the end of this manual. If "Factory Calibration" is selected in "Color Settings" only R,G,B is available here.

Using UP/DOWN arrows at homescreen you can change Quick Color's dimmer value.

Tunable White*

The standalone mode "Tuneable White" allows the color temperature (CCT) to be adjusted from 2.000K – 10.000K in 100K steps. Besides brightness and shutter also a +/- green and magenta correction is available.

To define a User Color please press ENTER to access to main menu (level 1).

While using the UP / DOWN arrows, please select the menu item "Stand Alone" and confirm by pressing ENTER. Select the item menu "User Color" by using the up/down controls and press ENTER.

Using UP and DOWN select your desired preset number (Color 1 -5) and confirm with ENTER.

Use UP and DOWN controls to select your desired color, confirm by ENTER and adjust the value by up and down controls between 000-255 and confirm all entries with ENTER.

With dimmer you can adjust the allover brightness of your User Color. Shutter allows several strobe effects. Once your color mix is ready, jump back by ESC. Your individual color is stored under the selected color preset now.

① *Note: All five User Colors are also available by DMX at Color Macro channel. Using one of the RGB DMX modes, only User Colors mixed out of RGB values are available. For Direct modes, both RGB and RGBL User Colors are available. For detailed information please see Color Macro Chart at the end of this manual. Using UP/DOWN arrows at homescreen the Color Macros can be changed according to the list.

Shutter: Please see detailed explanation for strobe effects inside DMX chart at the end of this manual.

Timer*

Via the internal timer function, all Stand Alone modes except "Auto" and "Editor" can be conveniently faded in and out after the function is enabled in the previously activated standalone mode, without the need for an external controller. Also it remains active even the fixture is switched off and restarted. simultaneously, the timer function is available via cable as well as via wireless DMX for master & slave operation. The fade-in time can be set from 0 to 60 minutes, the dwell time from 1 to 24 hours and the fade-out time from 0 to 60 minutes.

To select "Timer" please press ENTER to access to main menu (level 1). While using the UP / DOWN arrows, please select the menu item "Stand Alone" and confirm by pressing ENTER.

Select the item menu "Timer" by using the up/down controls and press ENTER. Now you can activate / deactivate the Timer function, select "Fade In", "Dwell Time" or "Fade Out" for the individual settings and confirm with ENTER. In each case a three-digit number field will be displayed. Use UP and DOWN to set the value as required from 000 to 060 minutes for "Fade In" and "Fade Out", or 001 to 024 hours for the "Dwell Time". Confirm by pressing ENTER again.

5.4.5.1 Reset Functions

1. Via DMX

Factory / User Reset only starts if shutter channel has the DMX value "250" at the same time

⇒ Factory Reset:

DMX address and DMX mode stay on the same value as set before the reset. All other settings will set back to default

⊕ User Reset:

DMX address and DMX mode stay on the same value as set before the reset. There is no LED / Fan test. All other settings will set back to User Reset List.

2. Via RDM

Factory / User Reset only starts if shutter channel has the DMX value "250" at the same time

⇒ Factory Reset:

DMX address and DMX mode stay on the same value as set before the reset All other settings will set back to default

DMX address and DMX mode stay on the same value as set before the reset. All other settings will set back to User Reset List.

There is no LED / Fan test

3. Via Menu / Display Shortcut

→ Factory Reset:

Display Query:

"> With Add. / Mode

No Add. / Mode

RESET NOW?"

- ⊕ If "With Add. / Mode" is selected, DMX address is set to "1" and DMX mode changes to default mode.

 All other settings will set back to default
- → If "No Add. / Mode" is selected, DMX address and DMX Mode stay at current values. All other settings will set back to default

⊕ User Reset:

Display Query:

"> With Add. / Mode

No Add. / Mode

RESET NOW?"

- ⊕ If "With Add. / Mode" is selected, DMX address is set to "1" and DMX mode changes to the mode defined by
 "User Reset List / DMX Mode". All other settings will set back to User Reset List.
- → If "No Add. / Mode" is selected, DMX address and DMX Mode stay at current values. All other settings will set back to User Reset List.

Unit Starts LED / Fan test.

6. ACCESSORIES

6.1 Filters

Available filters of ROXX NEO lite with order numbers:

Very Narrow 10° Art.: 14907001

Wide 80° Art.: 14907301

Narrow 15° Art.: 14907101

Horizontal 60° x 10° Art.: 14907401

Medium 40° Art.: 14907201

Vertical 10° x 60° Art.: 14907501

6.2 More accessories

8-way Barndoor Art.: 14907601

Omega Bracket ST Art.: 90900002-2

Amptown Case 6x tba.

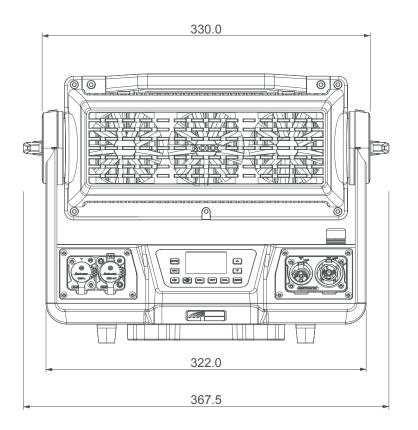

Casetec Case 6x Upside down tba.

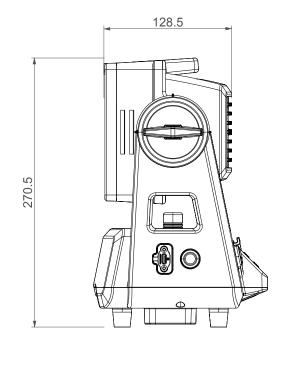

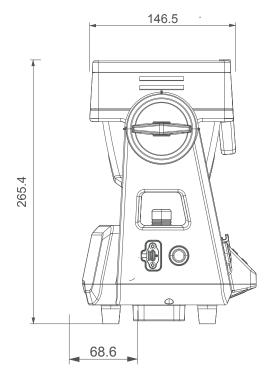

Casetec Case 6x Head ip tba.

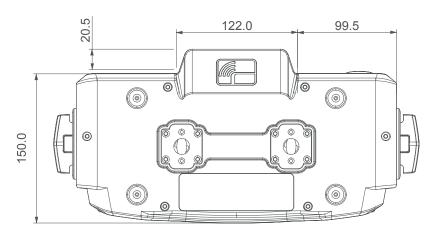

7. TECHNICAL DATA / DIAGRAMS

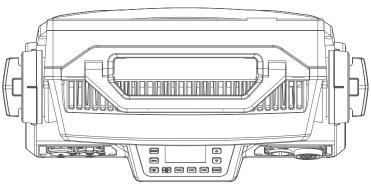

7.1 Technical drawings and measurements

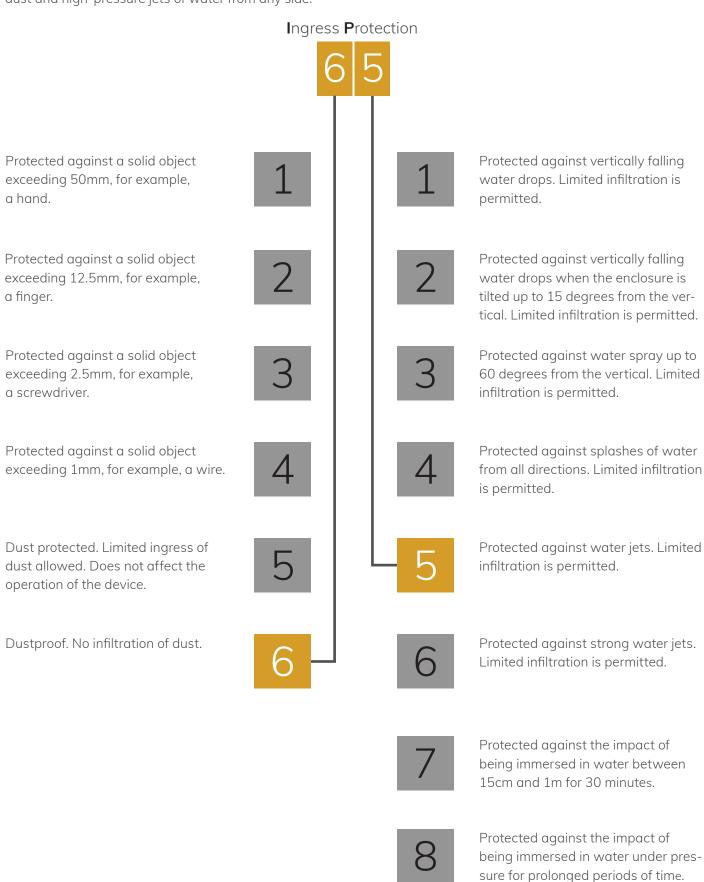

7.2 IP Rating

ROXX products conform to officially classified IP standard levels. NEO lite is rated to IP65 when using the covers for the housing parts. IP stands for Ingress Protection and IP65, according to classified standard, means shielded against dust and high-pressure jets of water from any side.

7.3 Technical Data

| Photometrics | | | | |
|---|---|--|--|--|
| LED expected lifetime | 50.000 hours | | | |
| Lightsource | 10x 20W RGBL | | | |

7.5 RDM Templates*

The ROXX NEO lite features support for various RDM functions. RDM (Remote Device Management) is a protocol enhancement to USITT DMX512 that allows bi-directional communication between the fixtures and the controller over a standard DMX line. This protocol will allow configuration, status monitoring and management. You will need a RDM controller to get control over the supported parameters. See the tables below for supported RDM features.

| Label: | ROXX NEO lite |
|---------------|---------------|
| Model: | NEO lite |
| Manufacturer: | ROXX |
| ID: | 6A6Ah |
| Device ID: | 0141 xxxx |

RDM functions

For easy identifying ROXX NEO lite mini mini during RDM process the unit will jump from white color to blue color every second.

Sensors

RDM enables various readouts for remote device monitoring. See the table below for sensors and sensor types. Please note: The RDM controller communicates with the fixtures to show only the available sensors for this fixture. The table is subject to change without notice.

| Name | |
|------------------|------------|
| Temperature | xx°C/xxx°F |
| Software Version | SW-Version |
| Errors | |

8. TROUBLESHOOTING

Did you try turning the device off and on again?

| Problem | Reason | Solution |
|---------------------------------------|--|--|
| Device is not responding. | No power. | Check cable connections and conform that power is switched on. |
| Device is not responding. | Fuse defect. | Contact your qualified service technician / manufacturer. |
| Device has turned off. | Power failure or power was turned off. | Check power supply, fuse, connections, switches. |
| Device have attacked as a second in a | DMX cable correct? | Check cables. |
| Device has stopped responding. | Wireless connection got cut off. | Check wireless transmitter and connection signals. |
| | DMX cable inverted (pins correct?) | Use a phase inverter or different cables. |
| Device operates strangely. | DMX cable terminated? | If not, install DMX termination at the end of the cable. |
| | Stand Alone program running? | Stop internal Stand Alone. |
| | No Bluetooth Connectivity | Please make sure your mobile device is inside the connectivity range of maximum 10-15m. |
| | Bluetooth is disabled at your mobile device | Please eanble Bluetooth at your mobile device settings. |
| | Mobile device has wrong Bluetooth Pin | Please use same Bluetooth Pin to connect ROXX. APP with the fixture. Current BLE Pin can be read out inside fixture's wireless DMX settings. |
| No Bluetooth Connectivity | Mobile device has different Bluetooth connectivity | As only one Bluetooth connectiviy can be active, please make sure your mobile device is currently not connected to some other devices. |
| | Different mobile device is still conneced to the fixture | Please disconnect other mobile device from fixture. |
| | No Bluetooth Advertisment | Please send new BLE advertisement by enable "BLE Link" inside Settings of the fixture. |
| | Bluetooth module has hang up | Please enable Factory Reset at the fixture to re-start the Bluetooth module. |

9. MANUFACTURER'S DECLARATION

Manufacturer's Warranty & Limitations of Liability

Please find our warranty conditions and limitations of liability inside our manufacturer's declaration at www.roxxlight.com/support

Requesting Warranty-Service

To request warranty service for your product, please contact:

ROXX GmbH.

Hansestr. 91, 51149 Köln

Email: info@roxxlight.com or the ROXX authorized reseller in your country, from where you purchased your product.

Correct Disposal of this product

This is for the European Union and European countries with electrical waste collection systems. When this label is shown on the product or brochure it means that the item cannot be disposed with household waste. In order to prevent damage to the environment or human health please do not dispose this product uncontrolled. Make sure to act responsible, recycle this product separately from other types of waste to enable lasting reuse of resources. Private users please contact the retailer where you purchased this product or your local authorities to find out where and how proper recycling of this item is possible. Business users please contact your supplier or check the terms and conditions of your purchasing contract. Make sure not to mix this product with other commercial waste.

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CE Compliance

The equipment marketed by ROXX GmbH complies (where applicable) with the essential requirements and other specifications of the following Directives:

- 2014/53/EU (RED)
- 2014/30/EU (EMC)
- 2014/35/EU (LVD)
- 2011/65/EU (RoHS)

The complete EU- and UK-Declaration of Conformity can be found at www.roxxlight.com/support, or you can also request it at info@roxxlight.com
