

SHOWPRO

Deco Bar

SHWBAR100

RGB - IP65

User Manual

Introduction

Packaging: Thank you for purchasing the ShowPRO Deco Bar. Before operating, please check the fixture to ensure that no damage has occurred during transit. If damage is found, or the light operates abnormally, please contact the distributor for further instructions.

Overview: The Deco Bar has three operating modes:

- DMX Mode
- Auto Mode
- Master/Slave Mode

There are five DMX modes: 2, 3, 4, 7 and 10 channel.

SAFETY AND HANDLING

Before operating the Deco Bar, read the manual carefully. Always make sure to include the manual if you pass/rent/sell the unit to another user. This manual cannot address all possible dangers and working environments. Please use your own caution when operating. This product is for professional use only, not household use.

- Do not operate this unit in areas with high ambient temperatures. It will cause abnormal function or damage.
- Always use a suitable safety wire when rigging the light overhead.
- Connect the safety wire to the intended safety mount.
- Always follow local safety requirements.

- Only qualified technicians may repair this product.
- Do not open the product housing.
- Do not supply power if the fixture is damaged.

- Do not look directly into the light source.
- Looking into the light source can cause damage to your eyes.
- Do not look at the light source with a magnifying glass or any other optical instrument that may concentrate the light output.

- The housing of the fixture can become hot. It can reach up to 70°C during normal operation.
- Ensure that accidental physical contact cannot occur with the fixture.
- Only install in well ventilated locations.
- Do not cover the fixture.

LI-ION Battery: A rechargeable lithium ion battery is built into this unit.

- Only authorised technicians may service the battery
- Do not place near heat or flames.
- Do not use or charge the fixture if damaged.
- Avoid bumping or dropping. It may cause a fire or an explosion.
- Never store the battery when fully drained.
- Immediately recharge if the battery is drained.
- Make sure to fully charge all units before storing them.
- Partially charged batteries will lose capacity.
- The battery shall only be replaced with an original spare part.

- Always charge with the flight case open.
- It is recommended to charge with ambient temperatures between 15°C and 35°C.

- The light contains a lithium ion battery.
- At end of life, dispose the unit responsibly in accordance to local regulations or procedures.
- The packaging is recyclable.

Troubleshooting

The fixture does not turn on.

The battery might not have charge. Connect to power and try again.

The fixture and display turns on, but the LED engine does not emit.

The fixture could be set to BLACKOUT mode or set to DMX Hold and isn't receiving a valid signal. Verify if receiving DMX. Perform a Factory Reset.

The fixture is not working correctly- it does not output the colour or effect it should be.

Check that the DMX address and mode is set correctly. Ensure that the fixture is receiving DMX. Otherwise perform a Factory Reset.

The fixture still cannot be controlled, or not as expected after Factory Reset.

Power cycle the fixture by removing the power. If the issue still occurs, contact distributor.

The fixture doesn't run long enough on battery.

The fixture runtime can be set and is defaulted to seven hours. You can set the runtime to a different duration if required.

Alternatively program the fixture using colours with less mixing.

The batteries performance can be reduced in colder environments.

The fixture is not charging when connected to power.

The fixture will only charge when the battery is less than 45°C. Turn the fixture off and allow the fixture to cool down after operation. Once at the optimal temperature, the fixture will begin to charge.

If the fixture still doesn't charge, please contact the distributor.

Mechanical Specification

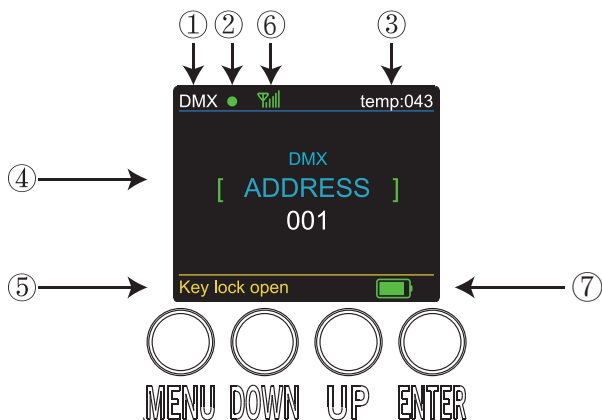

Package Contents

- 1 x Power cable
- 1 x Power adapter
- 1 x User manual
- 1 x Fast lock

Display Introduction

1. Indicates if you are in DMX mode or in SLAVE mode. Will display either DMX or SLAVE.
2. Displays the condition of signal being transmitted. Green is connected. Red is disconnected.
3. The temperature of the fixture.
4. The current menu selection.
5. Status of the key lock.
6. Indicates the condition of the wireless signal. Green is connected and red is disconnected.
7. Indicates the battery capacity/usage.

When DMX and Wireless signal is green, it means that DMX and Wireless is activated and connected.

When DMX is red but Wireless signal is green, it means DMX is disconnected and Wireless is connected.

If DMX is green and wireless signal is red, DMX is connected and Wireless is disconnected.

If DMX and Wireless is red, DMX and Wireless is disconnected.

If the temperature goes from white to yellow, the temperature is beyond the max temperature set in settings.

If there is no temperature and “Error” is displayed, there is an issue with the fixtures temperature and further investigation needs to be made.

When the battery is charging, the icon will run from empty to full. When charging has been stopped, the icon will show the battery level.

APP Connection

Navigate to the 'Input Select' menu and press ENTER.

Press ENTER with 'Vision App' selected.

Press ENTER on 'Unlink' menu, and press ENTER again.

App Download

Open the camera application on your device and scan the QR code which corresponds to the operating software on that device. The link will navigate you to download the Vision Control App.

App Store

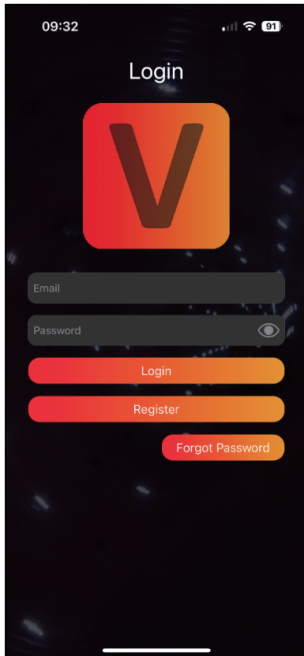

Google Play

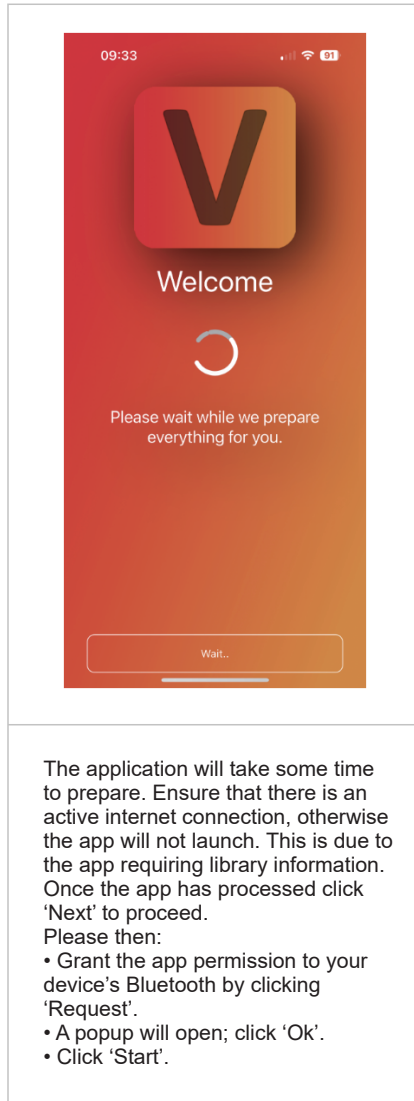

Microsoft

Once you have downloaded the Vision App via the QR codes provided, open the app.

- Click the register button to enter the registration screen.
- Fill in all required fields and click 'Register' to submit the information.
- Check your email for confirmation (check the spam folder if it's not in your inbox).
- Click on the confirmation link provided in the email. This will navigate you to a website with confirmation of successful registration.
- Return to the Vision App and use the email and password you registered with.

Mesh Networking

EASY INTERACTION WITH YOUR FIXTURE:

NFC support included

EFFORLESS FIXTURE SETUP PROCESS:

No knowledge of DMX/RDM required

LARGE EFFECT TEMPLATE LIBRARY:

Smooth background-Fast party effects

CONNECT TO YOUR NETWORK:

No separate gateway required

FIXTURE TO FIXTURES COMMUNICATION:

Creating a powerful and robust network without range limitations

SYNCHRONIZED & FIXTURE TO FIXTURE EFFECTS:

Seamless Transition

REAL TIME CONTROL:

Control your fixtures without delay

ACCESSIBILITY FROM ANYWHERE:

Cloud synchronization for app & Fixture data

Features

OPTICS

- Light Source: 27x3W RED + 27x3W GREEN + 27x3W BLUE
- Beam Angle: 60x10°
- DMX Channel: 2, 3, 4, 7 & 10 CH

ELECTRICAL

- Power consumption: 108W
- Voltage: AC 110 - 240V, 50/60Hz
- Input voltage:DC 18V / 5A

BATTERY

- Battery: Lithium Batteries
- Charge Time: 4 Hours
- Working Time: 2-19H or over boost mode for customised setting
- 70% after 300 times charging recycle

EFFECT

- Electronic 16-bit dimmer, 50 preset colour macros, CCT range of 2500K to 10,000K.
- Built-in Effect: Colour mixing, colour chasing, strobing and fade.

CONTROL

- Lumenradio
- Run Mode: Static Mode /Master & Slave /Auto Mode
- Bluetooth
- Protocol: DMX 512, RDM

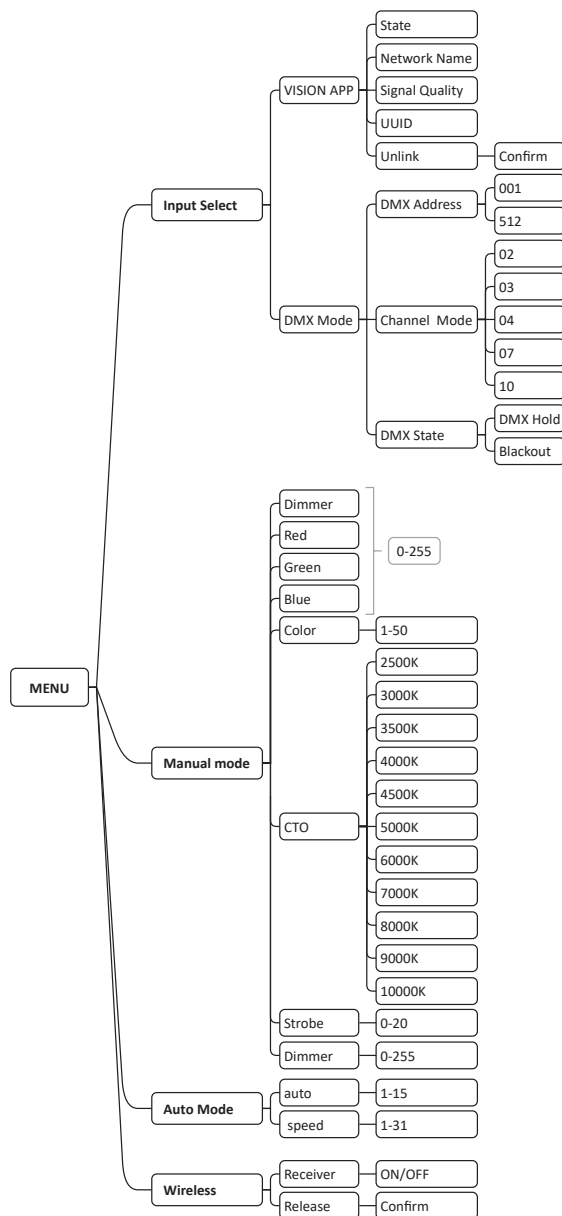

SOFTWARE

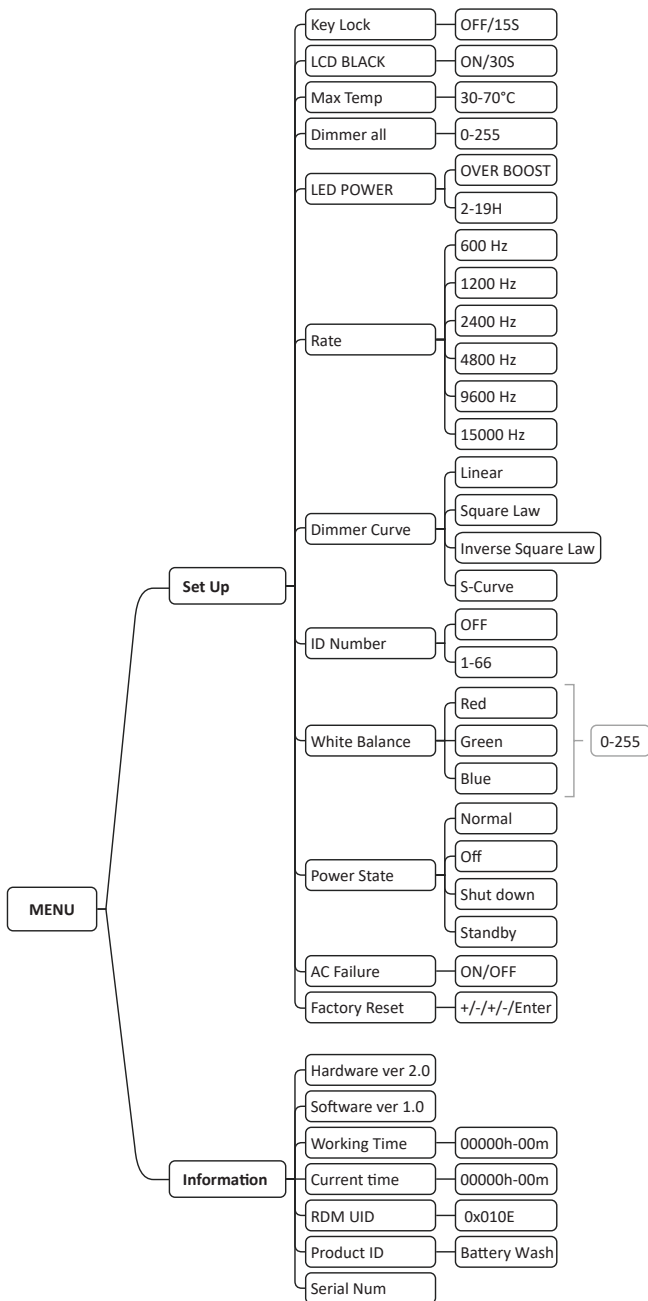

- 15 internal programs
- 4 dimming curves
- Smart temperature control
- Run time record

PHYSICAL

- Material: Aluminum body
- TFT Display with four buttons
- Dimensions: 515 x 117 x 170mm
- Weight: 5kg
- IP Rating: IP65

Menu Structure

INPUT SELECT In this menu, you can use APP control function via a Bluetooth connection to your phone.

1. Press the ENTER button and use UP or DOWN buttons until "VISION APP" is displayed.

(1) Press ENTER to display "UNLINK". Press ENTER again to show "CONFIRM", then press ENTER once more to clear the connection.

(2) Press UP or DOWN buttons, and the APP connection state, network name, signal and UUID will be displayed.

DMX MODE: In this mode you control the lights with an external controller outputting DMX512 protocol.

(1) Press ENTER button and use the UP or DOWN buttons until "DMX ADDRESS " is displayed. Press the ENTER button, "xxx" will appear. "x" represents the current address set. Use UP or DOWN to set the desired address (001-512).

(2) Press ENTER and use UP or DOWN buttons until "CHANNEL MODE " is displayed. Press ENTER, "Channel [xx]" will appear. "x" represents the current DMX channel mode. Use the UP or DOWN buttons to select your desired Channel mode (02,03,04,07,10).

MANUAL MODE—In this menu, you can adjust DIMMER(000-255), RGB(0-255), COLOUR(1-50), CTO(2500K-10000K) and STROBE(1-20).

1. Press the ENTER button and use UP or DOWN until "MANUAL" is displayed.

2. Press ENTER. There are 7 options to select from. Use the UP or DOWN buttons and press ENTER to select and confirm the desired option and value.

(1) DIMMER - Adjust the dimmer/intensity.

(2) RED - Manually set the red intensity.

(3) GREEN - Manually set the green intensity.

(4) BLUE - Manually set the blue intensity.

(5) COLOUR - Sets the fixture to one of the 50 pre-programmed colours.

(6) CTO - Selectable CTO from 2500K to 10000K.

(7) STROBE - Set and adjust the strobe speed.

AUTO MODE- In this menu, you can select an AUTO mode (1-15) and adjust the running speed (1-31).

1. Press ENTER and use UP or DOWN until "AUTO" is displayed.

2. Press ENTER, and "SPEED" or "AUTO MODE" will appear. Press ENTER to select and adjust either:

(1) SPEED - Select the desired speed.

(2) AUTO - Select the desired auto mode.

WIRELESS- Set or clear a wireless connection.

1. Press ENTER and use UP or DOWN until "WIRELESS" is displayed.

2. Press ENTER, and "RECEIVER" or "RELEASE" will appear. Use UP or DOWN to navigate and ENTER to confirm either of the following:

(1) Receiver- Enable or disable wireless functionality of the fixture. "ON" enables wireless signal. "OFF" disables wireless functionality.

(2) Release- Clears previous links and connections. "SUCCESS" will be displayed when the wireless connection has been successfully cleared.

SET UP- In this menu you can adjust the value of a function.

1. Press the ENTER button and use the UP or DOWN buttons until "SET UP" is displayed.

2. Press ENTER. There will be 12 options. Press ENTER to select an option and use UP or DOWN to change values.

(1) KEY LOCK- Choose whether the menu password is active.

By default the password is UP + DOWN + UP + DOWN .If "ON", the user has to input the password before entering the menu. The light cannot be altered until the correct password is entered.

- (2) LCD BLACK- Select between "ON" or "30S". If "ON" is selected, the display will constantly output. If "30S" is selected, the display will turn off after 30 seconds of no user input.
- (3) MAX TEMP- A custom Max working temperature can be set for the fixture. When the temperature exceeds the value set, the text colour of "Temp xx" in the main display will change from white to yellow. Meanwhile, the fixture will adjust the working temperature automatically.
- (4) DIMMER ALL - Adjusts the brightness over all colours.
- (5) LED POWER- Adjust the battery runtime with OVERBOOST or from 4 to 24 hours.
- (6) POWER STATE- Sets the power status. "Normal" means normal operation, "OFF" and "Shutdown" is direct shutdown, and "Standby" turns the screen and LEDs off.
- (7) RATE- Set the refresh rate. Selectable rates are:
(600Hz,1200Hz,2400Hz,4800Hz,9600Hz,15000Hz).
- (8) DIM CURVE - Can select a desired dimming curve(curve1-curve4).
- (9) ID NUMBER- Sets the fixture with an ID number (1-66) or "OFF".
- (10) WHITE BALANCE - Adjust the brightness of each colour(RGB) from 0-255.
- (11) AC FAILURE- Tests the power supply system and ensures proper operation.
- (12) FACTORY RESET- Resets all values set to default. The password is:
UP + DOWN + UP + DOWN

INFORMATION- Provides information of the software version, hardware, RDM UID, Serial number, Product ID and the working time and current time of the fixture.

- 1. Press ENTER button and use UP or DOWN until "INFO" is displayed.
- 2. Press ENTER. Use UP or DOWN to navigate and then ENTER to view:
 - (1) SOFTWARE- The running Software version.
 - (2) HARDWARE- Displays the Hardware information.
 - (3) WORKING TIME- Total operating hours since manufacture.
 - (4) CURRENT TIME- The operation time since powering on.
Note: Only displays if greater than one hour.
 - (5) RDM UID- Displays the RDM UID information.
 - (6) Product ID- The Product ID of the fixture.
 - (7) Serial Number- Serial Number information.

Connection

Master / Slave connection

Wireless connection

Ensure that the fixture is set to receive WDMX:

Menu > Wireless > Receiver > On

Pairing:

Menu > Wireless > Release > Press 'ENTER' button

Once paired successfully the fixture will display a green wireless signal.

A red wireless signal icon represents no connection.

Release Pairing

Menu > Wireless > Release > Press 'ENTER' button

To clear the pairing after successful connection, navigate until 'Release?' is displayed. Press the 'Enter' button to release. The display will show "SUCCESS" when the signal is successfully released. And the wireless signal icon will turn green to red.

Ensure that the transmitter is placed in a good position. The antenna of the fixtures should face towards the transmitter. The estimated wireless range is 200m.

Mounting

When installing the unit, the trussing or area of installation must be able to hold 10 times the weight without any deformation. When installing the unit, secure it with an appropriately rated safety chain. Ensure the area beneath the fixture is clear when mounting, removing or servicing the unit.

Overhead mounting requires extensive experience, including calculating working load limits, installation material being used, and periodic safety inspection of all installation material and the unit. If you lack these qualifications, do not attempt the installation yourself. The installation should be checked by a skilled technician once a year.

The Deco Bar is fully operational in three different mounting positions: hanging upside-down from a ceiling, set on a flat level surface or mounted on its side. Be sure to keep the fixture at least 0.5m away from any flammable materials (decorations etc.). Use an appropriately rated safety chain to prevent accidental damage or injury to persons in the event the clamp fails.
