

Hue Par

SHWPAR110
RGBWAUV - IP20

Packaging: Thank you for purchasing the Hue Par. Before operating, please check the fixture to ensure that no damage has occurred during transit. If damage is found, or the light operates abnormally, please contact the distributor for further instructions.

Overview: The Hue Par has four operating modes:

The Hue Par has four operating modes:

- DMX Mode
- Auto Mode
- Master/Slave Mode
- Sound Mode

There are four DMX modes: 7,9,12&19 channel

In addition if you daisy chain fixtures together in DMX mode and set one in Auto Mode and the others in Master/Slave Mode, the fixtures in Master/Slave Mode will follow the fixture in Auto Mode

SAFETY AND HANDLING

Before operating the Expo Bar, read the manual carefully. Always make sure to include the manual if you pass/rent/sell the unit to another user. This manual cannot address all possible dangers and working environments. Please use your own caution when operating. This product is for professional use only, not household use.

- Do not operate this unit in areas with high ambient temperatures. It will cause abnormal function or damage.
- Always use a suitable safety wire when rigging the light overhead.
- Connect the safety wire to the intended safety mount.
- Always follow local safety requirements.

- Only qualified technicians may repair this product.
- Do not open the product housing.
- Do not supply power if the fixture is damaged.

- Do not look directly into the light source.
- Looking into the light source can cause damage to your eyes.
- Do not look at the light source with a magnifying glass or any other optical instrument that may concentrate the light output.

- The housing of the fixture can become hot. It can reach up to 70°C during normal operation.
- Ensure that accidental physical contact cannot occur with the fixture.
- Only install in well ventilated locations.
- Do not cover the fixture.

- At end of life, dispose the unit responsibly in accordance to local regulations or procedures.
- The packaging is recyclable.

Troubleshooting

The fixture and display turns on, but the LED engine does not emit.

The fixture could be set to BLACKOUT mode or set to DMX Hold and isn't receiving a valid signal. Verify if receiving DMX. Perform a Factory Reset.

The fixture is not working correctly- it does not output the colour or effect it should be.

Check that the DMX address and mode is set correctly. Ensure that the fixture is receiving DMX. Otherwise perform a Factory Reset.

The fixture still cannot be controlled, or not as expected after Factory Reset.

Run DMX directly to the fixture, not part of a daisy chain. Power cycle the fixture by removing the power. If the issue still occurs, contact distributor.

Features

OPTICS

- Light Source: 7 x 10W 6 in 1 RGBWAUV LED
- Beam Angle: 25°
- DMX Channel: 7, 9, 12 & 19 CH

ELECTRICAL

- Power consumption: 70W
- Voltage: AC 110 - 240V, 50/60Hz

EFFECT

- Dimming 0-100%with regulated constant color control
- Strobe: 10 Flashes per second (any color)

CONTROL

- Operation Mode: DMX 512,Manual,sound,internal program
- Control panel: Digital 4 characters alphanumeric

PHYSICAL

- Material: Aluminum body
- TFT Display with four buttons
- Dimensions: 258x 190x 208mm
- Weight: 2.5kg
- IP Rating: IP20

Accessory

- ① Power cable x 1
- ② User manual x 1
- ③ IR Remote x 1

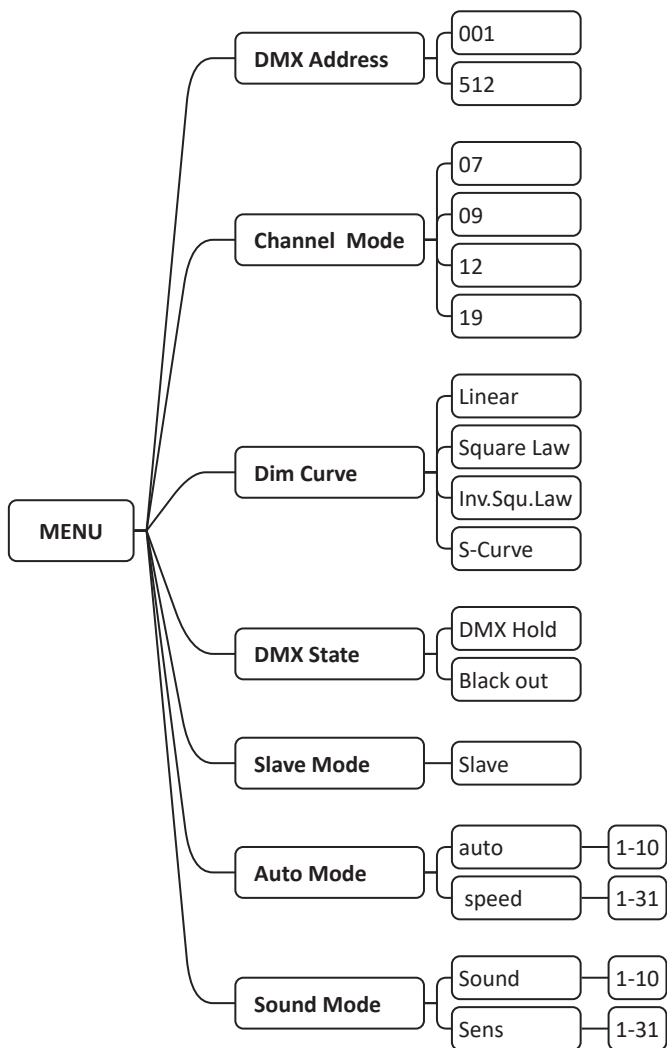

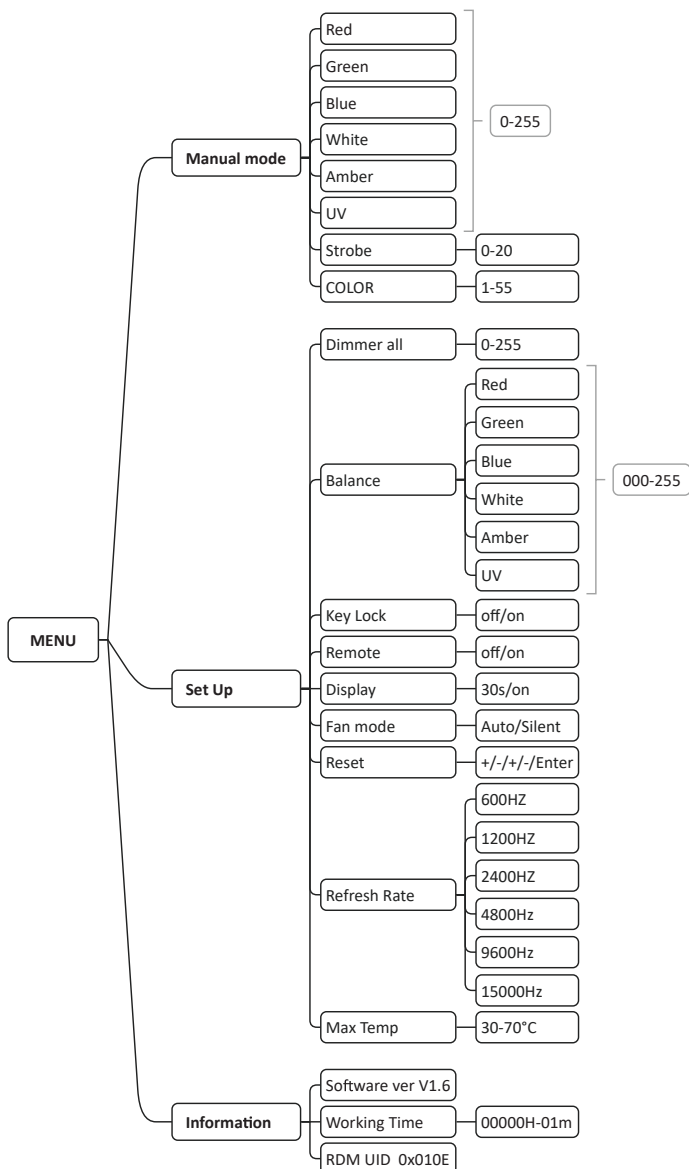

Display Introduction

1. Indicates if you are in DMX mode or in SLAVE mode. Will display either DMX or SLAVE.
2. Displays the condition of signal being transmitted. Green is connected. Red is disconnected.
3. The temperature of the fixture.
4. The current menu selection.
5. Status of the key lock.

Menu Structure

DMX Address: In this mode you control the lights with an external controller outputting DMX512 protocol. Press ENTER button and use the UP or DOWN buttons until "DMX ADDRESS " is displayed. Press the ENTER button, "xxx" will appear. "x" represents the current address set. Use UP or DOWN to set the desired address (001-512).

Channel Mode: Press ENTER and use UP or DOWN buttons until "CHANNEL MODE " is displayed. Press ENTER, "Channel [xx]" will appear. "x" represents the current DMX channel mode. Use the UP or DOWN buttons to select your desired Channel mode(07,09,12,19)

Dimmer curve - In this menu, you can select a desired dimmer curve.

1. Press "ENTER" button and then UP or DOWN button until "DMX CURVE" is shown.
2. Press "ENTER" button, and use the UP or Down buttons to select a curve. Press ENTER to confirm.

DMX State: In this menu, you can adjust the DMX state (DMX HOLD, BLACK OUT)

- (1) DMX HOLD – You can keep the DMX mode;
- (2) BLACKOUT - Blackouts DMX mode to have another mode active.

SLAVE MODE - In this menu, you can select one light as the MASTER light and others to be in SLAVE mode. Fixtures in SLAVE mode will follow the MASTER light.

1. Press "ENTER" button and then UP or DOWN button until "SLAVE MODE" is shown.
2. Press "ENTER" button to confirm.

AUTO MODE- In this menu, you can select an AUTO mode (1-15) and adjust the running speed (1-31).

1. Press ENTER and use UP or DOWN until "AUTO" is displayed.
2. Press ENTER, and "SPEED" or "AUTO MODE" will appear. Press ENTER to select and adjust either:
 - (1) SPEED - Select the desired speed.
 - (2) AUTO - Select the desired auto mode.

Sound - In this menu, you can select your desired sound mode.

1. Press the MENU button and UP button or DOWN button until "Sound Mode" appears, then press ENTER.
 - 1) Sound - You can select the sound mode (1-10) in this menu.
 - 2) SENS - You can adjust the sensitivity (1-30) in this menu.

MANUAL MODE—In this menu, you can adjust the values for RGBWAUV (0-255), Colour (1-55) or strobe (1-20).

1. Press the ENTER button and use UP or DOWN until "MANUAL" is displayed.
2. Press ENTER. There are 8 options to select from. Use the UP or DOWN buttons and press ENTER to select and confirm the desired option and value.
 - 1) RED - Manually set the red intensity.
 - 2) GREEN - Manually set the green intensity.
 - 3) BLUE - Manually set the blue intensity.
 - 4) WHITE - Manually set the white intensity.

- 5) AMBER - Manually set the amber intensity.
- 6) UV - Manually set the uv intensity.
- 7) COLOR - Sets the fixture to one of the 55 pre-programmed colours.
- 8) STROBE - Set and adjust the strobe speed.

SET UP-In this menu you can adjust the value of a function.

- 1. Press the ENTER button and use the UP or DOWN buttons until "SET UP" is displayed.
- 2. Press ENTER. There will be 8 options. Press ENTER to select an option and use UP or DOWN to change values.

- 1) Dimmer ALL - Adjusts the brightness over all colours.
- 2) BALANCE - Adjust the brightness of each colour(RGBWAUV) from 0-255.
- 3) Key locks - Choose whether the menu password is active.
By default the password is UP + DOWN + UP + DOWN .If "ON", the user has to input the password before entering the menu. The light cannot be altered until the correct password is entered.
- 4) REMOTE - Allows for remote control to be enabled or disabled.
- 5) Display - Select between "ON" or "30S". If "ON" is selected, the display will constantly output. If "30S" is selected, the display will turn off after 30 seconds of no user input.
- 6) RESET-Resets all values set to default. The password is [UP] + [DOWN] + [UP] + [DOWN].
- 7) REFRESH RATE – Able to set the refresh rate of the fixture.
- 8) Max temp - A custom Max working temperature can be set for the fixture. When the temperature exceeds the value set, the text colour of "Temp xx" in the main display will change from white to yellow. Meanwhile, the fixture will adjust the working temperature automatically.

INFORMATION- Provides information of the software version, hardware, RDM UID and the working time of the fixture.

- 1. Press ENTER button and use UP or DOWN until "INFO" is displayed.
- 2. Press ENTER. Use UP or DOWN to navigate and then ENTER to view:
 - (1) SOFTWARE- The running Software version.
 - (2) HARDWARE- Displays the Hardware information.
 - (3)WORKING TIME- Total operating hours since manufacture.
 - (4)RDM UID- Displays the RDM UID information.

Mounting

When installing the unit, the trussing or area of installation must be able to hold 10 times the weight without any deformation. When installing the unit, secure it with an appropriately rated safety chain. Ensure the area beneath the fixture is clear when mounting, removing or servicing the unit.

Overhead mounting requires extensive experience, including calculating working load limits, installation material being used, and periodic safety inspection of all installation material and the unit. If you lack these qualifications, do not attempt the installation yourself. The installation should be checked by a skilled technician once a year.

The Hue Par is fully operational in three different mounting positions: hanging upside-down from a ceiling, set on a flat level surface or mounted on its side. Be sure to keep the fixture at least 0.5m away from any flammable materials (decorations etc.).

Use an appropriately rated safety chain to prevent accidental damage or injury to persons in the event the clamp fails.
