

Pulze Bar

SHWSTR100

The Pulze bar is a high output linear strobe designed for a large range of applications. 384 RGB LEDs deliver a uniform wash and can be divided into 24 segments, creating impressive dynamic effects and eye candy. Paired with 360 White LEDs at the centre of the fixture, the Pulze Bar is more than capable as a strobe. An electronic frost can be activated to diffuse the output, allowing for looks with visible pixels or a smooth blended face. Housed in a sturdy IP65 body, the Pulze Bar is suitable for outdoor use, and the integrated mounting options make it easy to connect multiple fixtures without spending excessive time on alignment.

TECHNOLOGY

Pulze Bar Specifications

Optical System

Lamp Source	360x1W White + 384x0.5W RGB LED
Beam Angle	52°

Electrical Specifications

Voltage	100 – 240V AC 50/60Hz
Max Power	325W
Power Connection	True1 In/Out
Signal Connection	5pin DMX In/Out

Work Environment

Ambient Temperature	-10 to 40°C
IP Rating	IP65
